Lancaster Farming

Vol. 19 No. 27 | Lancaster Farming, Saturday, May 18, 1974 | $2.00 Per Year

Land Judging Victors Named

Solanco High School's FFA land judging team squeaked by the Ephrata team with a three-point lead to take top honors in this year's county FFA land judging contest. Last year, the Ephrata team beat Solanco by a margin almost as narrow.

Dale Burns, soil scientist who recently began working in the Lancaster County Soil and Conservation Service office, was the official judge for the contest. Competitors viewed five separate holes dug on the Parke Brackbill farm, near Refton. They rated the holes for their suitability for crops and other uses. Individuals were scored on their closeness to Burn's ratings for each hole.

Some 70 FFA'ers from nine schools competed in the event. Of the tope ten individuals, five were from Solanco, four were from Ephrata and one was from New Holland. Mark Hohenwarter of Solanco was first with a total of 434 points, and Ephrata's Barry Wissler was second with 417.

The top team in this year's Lancaster County FFA Land Judging Contest came from Solanco. The smiling victors are shown here receiving their winning trophy from Warren Wagner, vo-ag instructor at Lampeter-Strasburg. L-S was the sponsoring school this year. The team members, from left to right, are Joseph Overly, Mark Hohenwarter, Randy Ranck, Charles Coates and Gordon Herr.

U.K. Farmers On Tour Here

A group of touring English farmers stopped at three area farms on Thursday to chat with the owners about farm life and farm management. The 22 United Kingdom farmers embarked on their U.S. tour May 13 and will return home on May 23.

Lancaster Farming joined the group briefly at the Aaron Brubaker farm in Rohrerstown. The tour was sponsored by ICI, Ltd., a British chemical company which is among the largest in the world. The Lancaster County portion of the tour was hosted by Ortho along with P. L. Rohrer and Bros., Inc., Smoketown. ICI is the manufacturer of Paraquat which is sold in the U.S. under the Ortho label.

The surprising thing about this group of farmers was the size of their farms. The

FARM TRENDS by Dick Wanner

RECORD HIGH WINTER WHEAT CROP IS SEEN

U.S. winter wheat production now forecast at a record 1.612 billion bu. That's 27 pct. (342 million bu.) above last year's record crop, and higher than any total U.S. wheat crop grown prior to 1971.

Reason for the big gain: Larger acreage and a record-high projected yield. Harvested acreage is

FFA'ers Win State Proficiency Awards

Area youths fared well this week when the state FFA Proficiency Award winners were named in Harrisburg. Each first place award carries with it a $100 prize and the opportunity to compete in the Northeast Region proficiency contest. Regional winners will then go to vie for national honors at the next national FFA convention in Kansas City.

First place winners in the 13 different categories were:

Agriculture sales and-or service - J. Richard Groff, 1508 W. Main St., Ephrata.

Dairy production - Gregory A. Lanids, Lancaster RD6.

Placement in agricultural production - Nevin E. Mast, Morgantown RD1.

Agricultural processing - Lynn Ray Groff, 211 S. State St., Ephrata.

Poultry production - Michael L. Martin, New Holland RD1.

Agricultural mechanics - Glenn L. Long, Columbia RD2.

Ornamental horticulture - Jeff Keeney, 2826 Vireo Rd., York.

Beef production - Howard J. Stoltzfus, Eleverson RD2.

Fish and wildlife

Aaron Brubaker (wearing cap) learned about the impact of inheritance taxes in England from W. S. Elkington, right, a farmer on tour in the U.S. Elkington said inheritance taxes can total up to 90 percent of the value of a farm.

Farm-Home Scholarship Winners Announced

Nine smiling youthful faces graced the board room of the Lancaster County Farm and Home Center Wednesday night, as the Farm and Home Foundation board of directors voted to award each of the youths present a $400 scholarship. There would have been ten smiles, but scholarship winner Kris Halls is presently a student in Denmark.

All ten scholarship winners are 1973 or 1974 graduates of Lancaster County high schools, and all plan to attend college in the fall to major in either home

We Salute Dairy Industry June 1

Dairying is nearly a $50 million a year business in Lancaster County, and it's an important industry in surrounding counties, too. Chester and Berks Counties each produce about $20 million worth of milk annually, and York and Lebanon Counties each come close to the $11 million mark.

LANCASTER FARMING will recognize the area's dynamic dairy industry in its June 1 Special Annual Dairy Issue.

We extend a special invitation to dairy groups and organizations, as well as individuals, to submit articles and news on dairying for the Dairy Issue.

Advertisers are invited to make their own appeal to a large segment of the Southeastern Pennsylvania dairy market.

To be sure to make the Dairy Issue, please submit all material by Wednesday, May 29.

Call us at 394-3047 or 626-2191 (ask for Lancaster Farming) Or write to Lancaster Farming, P.O. Box 266, Lititz, Pa 17543.

19 loads straw 44.00-51.00, one load at 55.00.

13 loads corn 76.50-83.50.

David Good

Consignment Sale
May 15
North Maple Ave.
Leola, Pa.

Hay & Straw sold as follows: Hay 36.00 to 65.00 per ton; Straw 49.50 to 50.00 per ton; Ear Corn 82.00 per ton.

Paul Z. Martin

Wednesday, May 15

33 loads of hay and straw sold as follows:

Alfalfa 69, 83, 85; Timothy 31, 46, 50; Mixed Hay 37.50, 54, 66.50; Straw 43, 50, 56; Corn 1 load 80.00.

Local Grain

Thursday, May 16

These prices are made up of the average prices quoted by five participating local feed and grain concerns. It should be noted, however, that not every dealer handles each commodity. All prices are per bushel except ear corn which is per ton.

The average local grain prices quoted Thursday, May 16, 1974 are as follows:

	Bid+	Offered+
Ear Corn, Old	72.00	80.00
Ear Corn, New	74.00	80.00
Shelled Corn	2.80	3.02
Oats, Local	1.37	1.62
Oats, Western	1.77	2.02
Barley	2.20	2.50
Wheat	3.44	3.81
Soybeans	5.35	5.65

+Bid is the price the dealer will buy from the farmer delivered to the mill. Offered is the price the dealer will sell for at his mill.

What's Hindsight?

Hindsight is what a lot of women need when they're buying slacks!

Editor's Quote Book

Never in history have a nation and people had the opportunity that we now have to display greatness.

TRY A CLASSIFIED AD!

New York Dressed Meats

Thursday, May 16

Daily distributive less than carlot meat trade.

Compared with Wednesday: prices weak throughout for beef, veal, calf, and spring lamb. Pork loins and picnics $3.00 lower, butts $2.00 lower, spareribs steady, hams generally weak.

Movement of meats disappointingly slow and clearance poor at wholesale levels. Consumer urgency apparently easy overall and retailers report light customer numbers in stores so far this week.

Steer Beef

Prime 600-900 pounds 68.00-69.00; Choice 600-700 67.50-69.50; 700-800 66.00-68.00; 800-900 64.50-66.50; Good 500-800 66.00-68.00.

Heifer Beef

Choice 500-700 pounds 67.00-69.00.

Calf

150-350 pounds

Choice 86.00-92.00; Good 76.00-84.00; Standard 74.00-78.00.

Veal

Choice 90-150 pounds 111.00-115.00; Good 60-90 102.00-107.00; Standard 60-120 88.00-93.00.

Lamb

Choice and Prime 30-55 89.00-93.00; 55-65 86.00-89.00.

Choice Beef Cuts

Hinds (steer) 145-190 pounds 85.00-87.00; arm chucks 90-105 58.00-61.00; ribs (7 rib) 34-40 82.00-85.00; Loins (trmd) 50-70 112.00-115.00; Rounds (steer) 70-95 78.00-80.00; full plates 27.00-28..00; Hinds (heifer) 120-170 84.00-86.00.

Fresh Pork Cuts

Loins (regular) 8-14 72.00-74.00; Picnics (regular) 4-8 33.00-36.00; Boston Butts 4-8 47.00-50.00; Spareribs (3 pounds down) 85.00-88.00, Hams (skinned) 14-17 53.00-55.00; 17-20 48.00-51.00.

Kosher Steer Beef

Choice and Prime forequarters 56.00-60.00.

Omaha Cattle

Thursday, May 16

Compared with previous week's close: closing prices on average-Good to Prime steers 25-50 cents higher. Standard and low-Good holsteins 25-50 cents lower. Heifers were 50 cents higher. Cows were 50-1.00 lower, bulls strong to 1.00 higher. There were not enough feeders to afford a market test.

Four day receipts 16,000 as compared 21,200 previous week and 13,900 a year ago. Slaughter steers made up approximately 40 percent, heifers 38 percent.

STEERS: Several loads high-Choice and Prime 1059-1140 pounds predominantly 3 41.50-42.00, same grades 1150-1330 3-4 40.00-41.25. Choice 1000-1200 2-4 closed mainly 40.50-41.25, occasionally 41.50 on 1050-1150. Choice 1200-1368 3-5, many largely 4 39.00-41.00, several loads 1300-1350 39.00-39.50. Mixed Good and Choice 975-1225 39.50-40.50. Good 36.50-39.50, several loads 1250-1350 2-3 holsteins 36.50-37.00. Standard and low-Good 35.50-36.50.

Average cost slaughter steers first three days 40.16 average weight 1158 pounds as compared 39.94 and 1153 pounds previous week and 45.80 and 1123 a year ago.

HEIFERS: Five loads high-Choice and Prime 1014-1122 pounds 3-4 41.15-41.25, part loads 41.40-41.50. Moderate volume same grades 950-1122 3-4 40.75-41.00. Choice 850-1100 2-4 39.50-40.75, load 2-3 41.00, some 1200 3-5 39.50. Mixed Good and Choice 850-1000 39.00-39.75. Good 36.00-39.00. Standard and low-Good 34.50-36.00.

COWS: Utility and Commercial 27.00-29.00, a few Utility dairybreds 29 50-20.00. Canner and Cutter 24.00-27.00. Mixed Cutter and low-Utility 27.25-27.75.

BULLS: 1-2 1400-1800 pounds 35.00-38.00, 1 38.50-39.00, and individual 40 00.

PERSONALIZED FEEDING PROGRAMS
FULTON, ILL.

From Field . . .
To Storage . . .
To Livestock . . .

Preserve Maximum Nutrient Content and Palatability
by using

"Silo-King" Silage Preservative:

DON'T WASTE A THING, YOUR CROPS ARE TOO VALUABLE

— Hay or haylage value ranges from $20.00 to $80.00 per ton in feeding value: on a 10 percent dry matter basis.
— Due to the ever increasing cost of feeding and maintaining livestock, your future may depend on your handling of roughage in the most profitable manner.
— **To prevent weather loss** in making haylage, mow in the morning after the dew is off and chop that afternoon on a good drying day.
— And to help **prevent heating, vitamin loss, energy loss, protein loss,** and **silo-stink,** apply **"SILO-KING"** silage preservative.
— Another bonus from using **"SILO-KING" is greater silo capacity. This is due to the higher moisture content that's possible to maintain by using "SILO-KING"**

For oustanding results, proven again and again in 23 states and Canada.
For higher feeding value and greater silo capacity.

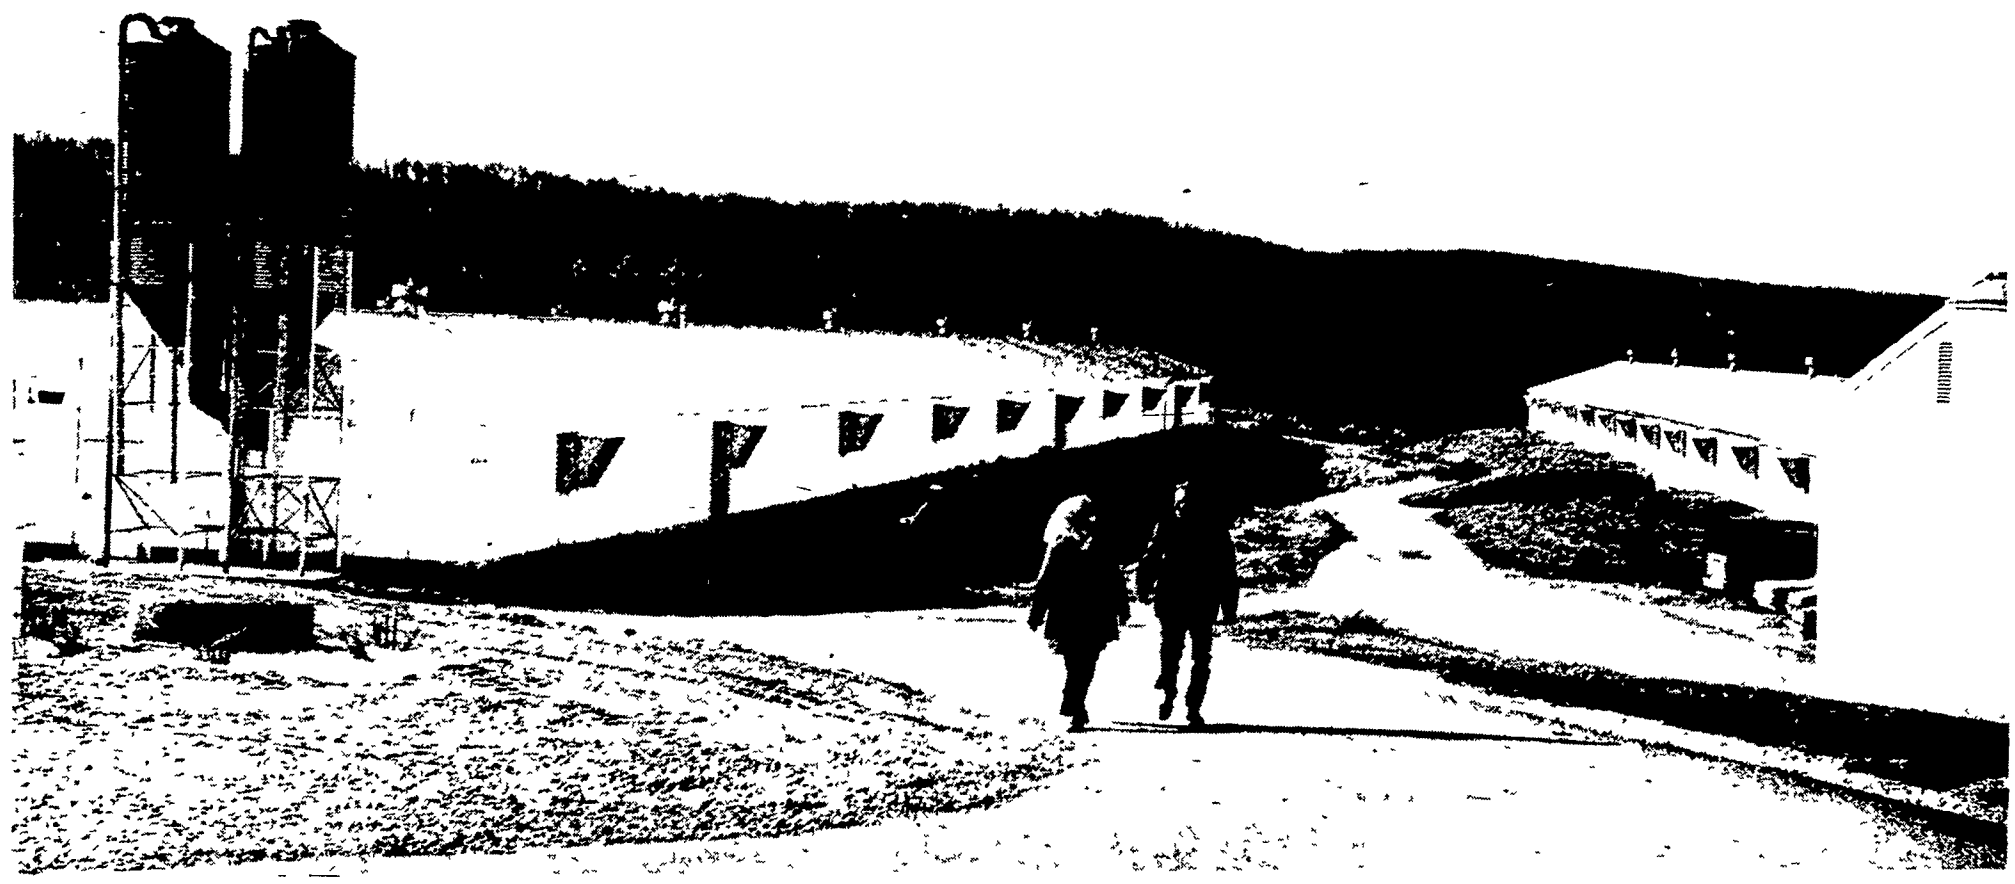
Pennfield's been keeping my records straight for years



"Pennfield's Computer Flock Analysis is almost like my personal bookkeeping department.

"The monthly computer sheet I get from Pennfield, tells me all the information I need to know to run my poultry operation.

"The accurate and complete records have helped me catch weaknesses in my feeding program, before they've become costly problems.

"In the beginning I used the computer sheet to get credit from the bank. It's so clear, even the bankers could understand it.

"At tax time, I go right to the computer sheet. Pennfield even figures depreciation the same as IRS.

"I could go on, but I think I've made my point."

THE OLD FARMER'S ALMANAC

MAY 20-26, 1974

We're in the lap of the year.

Is your will up to date, or do you have one? . . . Amelia Earhart flew Atlantic May 20, 1932 . New moon May 21 . . . Apple trees blossoming now Average length of days for week 14 hours, 51 minutes . Brooklyn Bridge opened May 24, 1883 Frog's gills now disappear . . . Red Cross founded May 21, 1881 . Civil War ended May 26, 1865 . . . A bright eye indicates curiosity, a black eye too much

Old Farmer's Riddle: What country are children happiest in' (Answer below.)

Ask the Old Farmer: Do you know of any way to prevent the spreading of grasshoppers and locusts' J.H., Canton, Ohio.

If you clip off one hind-leg with a pair of scissors, the critters will travel in a circle and they can't make any real headway at all

Home Hints When aluminum pans become dull boil some apple parings in them to bring back the old dazzle and shine Use a large plastic lawn bag to cover your barbecue grill to protect it from bad weather

Riddle answer England

OLD FARMER'S WEATHER FORECASTS

New England: Cloudy, rainy and cool most of week, possible clearing on weekend

Greater New York-New Jersey: Rainy and mild to start, then rain becoming moderately heavy, partial clearing and warm latter part

Middle Atlantic Coastal: Warm temperatures and rain throughout week, rain moderately heavy at times.

Southeast Coastal-Piedmont: First part of week mostly clear and warm, rain at week's end.

Florida: Mostly sunny and hot throughout week; late week rain in north

Upstate & Western N.Y.-Toronto & Montreal: Rain, heavy at times, all week

Greater Ohio Valley: Early week rainy and cool; end of week partly sunny and warm.

Deep South: Rain, heavy at times, all week and cool temperatures

Chicago: Week begins cool with light rain, then warmer; intermittent rain and some sun latter part.

Northern Great Plains-Great Lakes: Mostly sunny to start, then rain, warm with more rain latter part.

Central Great Plains: Cold at first with light rain in east, then sunny and warm; end of week pleasant in east and rainy in west.

Texas-Oklahoma: Moderate to heavy rain for first part of week, very cool and clear latter part.

Rocky Mountain Region: Partial clearing to start, then rain, end of week rainy and warm.

Southwest Desert: Clear at first, then moderately heavy rain, clearing and hot latter part.

Pacific Northwest: Cool to start, then rain in south and intermittent showers in north, rain moderately heavy throughout region at week's end.

California: Partly sunny and mild all week in south, partly cloudy with rain at first and on weekend in north.

Buck Tractor Pulls Located on Rt. 272 10 Miles South of Lancaster

Buck Tractor Track Opens

The Buck Tractor Pull track inaugurates its first season Friday night, May 24. Determined pullers in the 5000-pound open class will begin the evening's - and the season's - events with their competition at 7:30 p.m.

Other events on Friday evening will be the 9000-pound modified, the 9000-pound super stock and the 7000 pound open. Saturday evening's events, also beginning at 7:30 p.m.; will include the 7000-pound super stock, the 7000-pound modified, 12,000 super stock and 9000 open.

Woodrow Funk, a spokesman for the track, said they plan to stage pulls three or four weekends a month throughout the season. They will not have a pull on the one weekend a month when pulls are scheduled for the track at Kinzer.

Contestants in the weekend pulls will be competing for a total of $3000 in prizes. The newly built stadium seats 4000 and admissions to most pulls will be $2.50 for adults and $1.50 for children under 12. Funk said he expects around 100 tractors to be competing in the track's opening event. Indiana's Banter Brothers will be coming in for the weekend. The Banters racked up a lot of points last year in national competitions.

On June 21 and 22, an event billed as the Penn Springnational Pull will be staged at Buck. Tractors will again run on both Friday and Saturday nights, and top competitors from both the U.S. and Canada are expected to be on hand.

USDA Revises Gypsy Moth Regulations

The list of articles exempted from regulations of the gypsy moth quarantine, was slightly revised by the U.S. Department of Agriculture (USDA), effective May 3.

The revised exemption now allows movement of all stone and quarry products without certification if surveys show that the materials have not been exposed to infestation. Previously, non-exposed ground or pulversided stone and quarry items were allowed shipment without being certificed.

The action was taken by USDA's Animal and Plant Health Inspection Service (APHIS). According to Joseph T. Koski, Northeastern Regional Director for APHIS Plant Protection and Quarantine Programs in Moorestown, N.J.: "Improved quarry sanitation conditions and control procedures in recent years have reduced the likelihood of spreading gypsy moth with these products. Movements of stone and quarry items no longer have high risk in terms of artifically spreading gypsy moths outside the quarantined areas."

The gypsy moth was brought into this country in 1869 for scientific purposes, but accidentally escaped. Eleven northeastern states are now under quarantine regulations. Gypsy moth caterpillars damage and kill trees by stripping them of their foliage.

A complete list of the revised exempted articles will appear in the Federal Register May 3. Copies may be obtained by writing: Plant Protection and Quarantine Programs, APHIS, USDA, Federal Building, Hyattsville, Md. 20782.

Pictured above are the drivers of Fido, a competition tractor, for the 1973 season. Standing from left to right are Paul Stoltzfus, Ozz Arment, Dan Brubaker, Curt Stoltz, Charles Welsh, Arlene and Harold Rineer. Front row left to right are Tony Stauffer, Joel Sweitzer, Tim Stauffer, Harold Stauffer, Amos Stauffer and John Stauffer. In front of the drivers are the trophies won by Fido for the 1973 season. Fido is a German-made Deutz tractor with 85.5 horsepower, and weighing 7000 pounds. By adding weights Fido pulls in 7, 9, 12, 15,000 pound stock and super stock, 9, 15, and 18,000 pounds open classes. The tractor was entered in a total of 120 events last year, capturing 60 first place prizes.

Fulton Grange No. 66

Fulton Grange Number 66 held their regular meeting May 13 in the Grange Hall at Oakryn with the Master Charles McSparran conducting the business session. The following were appointed to instigate minor road repairs at a location on Route 222 in Fulton Township to reduce highway accidents: Clifford W. Holloway Jr., Sherman Hill and Jesse Wood.

The Chaplain Gyles Brown will be in charge of the annual Go-to-Church service to be held Sunday, May 19, 8 p.m. at Fulton Grange Hall. The Rev. Kenneth R. Hill, Beavertown, Pa. will be the speaker and Mrs. Harold J. Lindecamp will be soloist. A covered dish supper will precede the service at 7 p.m. with the following in charge: Mrs. Freeda Huber, Mrs. Jesse Wood and Mrs. Susan Fite. Rolls, butter and beverage will be provided. Grangers and friends should bring a meat dish, another dish and their own place settings. The public is invited to attend both the supper and the worship service.

Fulton Grange members will assist in the presentation of the program for Region E Pomona District visitation meeting to be held Saturday, May 18, 8 p.m. at Tyro Grange Hall, Buckingham, Bucks Co. Buckingham is located at the intersection of Routes 202 and 413, near Doylestown. All Lancaster Co. Granges as well as the Granges in Chester-Delaware Pomona, Montgomery and Lower Bucks counties comprise Region E and will participate in this meeting.

Several delegates from Fulton Grange will attend the Pa. State Grange Leadership School to be held at Gettysburg College June 25, 26 and 27.

Fulton Grange is presenting copies of their recently published Centennial booklet to the libraries of the Solanco Elementary, Junior and Senior High Schools and the Lancaster Public Library, also to the Lancaster Co. and the Pa. Historical Societies. It contains histories of Fulton Subordinate and Junior Granges, the Pa. State Grange and the National Grange, stories of Oakryn Hall, the Norman Wood bridge, the Southern Lancaster Co. Family Health Center and 90 photos of past Masters and personalities of Fulton Grange as well as many activities of Fulton Grange.

A plaque in recognition of 100 years of community service was presented to Fulton Grange from the National Grange and a resolution adopted by the Senate of Pennsylvania in recognition of 100 years of community service was read at this meeting. Mrs. George Hough was cited for her exceptionally fine paintings of murals for the centennial celebration.

Norman Wood will represent Fulton Grange at the Bicentennial planning meeting to be held at Mt. Eden Lutheran Church May 30, 7:30 p.m.

This meeting marked the end of the county Grange visitation meetings for this Grange year. Mrs. Richard Maule, Lecturer of Colerain Grange Number 1667, presented the program on the theme "Goals": Group singing, accompanied by Mrs. Melvin C. Boyce, "America The Beautiful." Mrs. Joseph G. Hess spoke of making better use of what we have. Better goals in legislation were stressed pro and con in regards to campaign contributions by Melvin Boyce Sr. and Joseph Hess. Mrs. William Fredd presented goals to try to feed ourselves for better health and spoke on "A Guide To Good Eating." Richard Maule spoke about the high cost for dairymen to get started in business. Mrs. Loran Brinton conducted games. Mrs. Richard Maule presented a reading. Melvin Boyce, Master of Colerain Grange, presented goals of Colerain Grange and Charles McSparran, Master of Fulton Grange, presented goals of Fulton Grange for this year. Mr. and Mrs. Raymond Earnhart, Oxford Grange, Chester Co. gave remarks.

The annual memorial service and a dedication of the Peter Fry memorial rug will take place at the next meeting May 27.

Revive Plants

Plants are still being shipped from nurseries by express or freight. If plants that are shipped to you are badly dried upon arriving, plunge them into pails of luke-warm water or "heel them in" moist earth for a few days until ground conditions are right for planting,, suggest Extension horticulturists at The Pennsylvania State University.

Smile!

It's always best to smile, because other people may be taking you at face value.

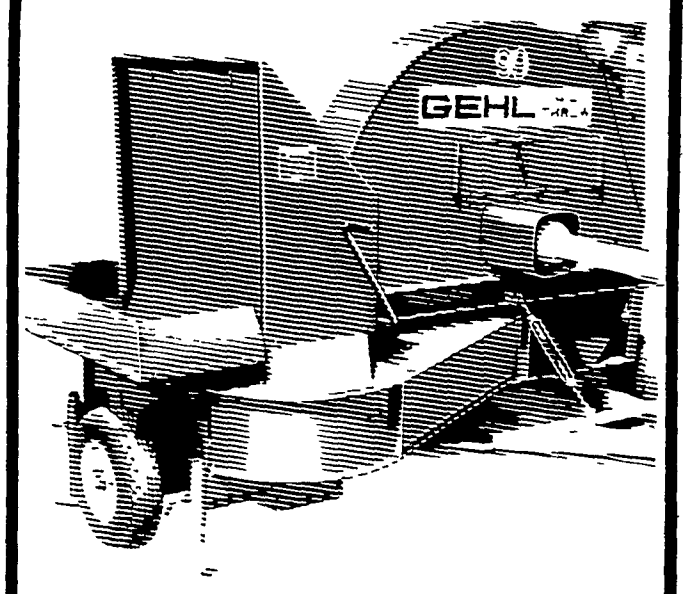
TWO BLOWERS IN ONE



Compare this blower to conventional blowers. The Gehl FB99 has staggered fan blades, six on each side of the rotor. They actually give you two blowers in one. The timed delivery of material from alternate paddles provides maximum use of available space in the nine inch pipe. Result is increased capacity. Alternate paddles provide a steadier flow of air and material. Pressure and velocity is maintained as material is blasted up the pipe. No gaps. No slowdowns. No more silo bottlenecks.

A Rose By Any Other Name . . .

A rose by any other name would still be a dirty word in some hospitals According to The Wall Street Journal, a small group of researchers warns that bacteria lurking in flower vases and potted plants may infect hospital patients in high-risk areas such as cancer, burn and kidney transplant units or those recovering from surgery Certain hospitals have banned flowers in the high-risk sections, while others feel the danger is too minimal to place the morale-boosting bouquets in exile

So even if your favorite begonia is barred from the hospital, somewhere there is another hospital which would welcome it, proving once again that freedom of choice and opportunity is alive and well in this land of ours, even for flowers!

Disrupting Food Production

During 1973, the cost of groceries went up about 20 percent in the United States Inflation hit the average grocery bill a little less sharply in many other countries, as, for example, Japan with 17 percent, England with 13 percent, Italy and France 11 percent and Germany only 5 percent Food in the U S remains a bargain relative to average levels of income The American people still spend a smaller percentage of their income for food than anyone else But if this is to remain the land of plenty, it is time to quit disrupting the machinery of food production, processing and distribution with such things as erratic, scarcity-producing price control programs and massive bargain-basement sales of such things as wheat and feed grain stocks to other nations

"Grassroots Opinion"

WINSTED, CONN , CITIZEN "Both expert study and casual observation suggest that most of us drive so as to use more gas than we need to Quick getaways, revving up to roar around the car ahead, rushing up to red lights only to wait for the green -- anything in short, that involves a heavy foot on the gas pedal wastes fuel A lot of other common practices let gas dribble away Allowing the motor to idle while you're chit-chatting, for example Using the car's electrical appliances sparingly saves gas because the engine recharges the electrical system Flooring the pedal to get up to the speed limit in a hurry uses more fuel than building up speed gradually as one expert reminds us, 'It takes more gasoline to get going than to stay going' With a little care, a tankful of gas can be made to last a good deal longer than it otherwise would"

xxx

According to Mr Aubrey J Wagner, chairman of the Tennessee Valley Authority, "With electricity it is extremely difficult to determine what is wasteful It permeates our lives from morning until night We can forget the electric toothbrushes and other gimmick uses of electricity because they consume so little The water heater, the clothes washer and dryer, the dishwasher, the electric range, and the vacuum cleaner are the main users in the home But they save drudging labor for the housewife, brightening her environment Are they wasteful?"

THE BIBLE SPEAKS
International Uniform Sunday School Lessons
BY LAWRENCE W ALTHOUSE

THE SCANDAL OF GOD'S WILL

Lesson for May 19, 1974

Background Scripture: Acts 21 through 22.

Devotional Reading: John 15:18-23.

I am often appalled by the hideous things people say about the will of God. No matter how great the tragedy, there can always be found someone to intone: "It must have been God's will!" The assumption seems to be that God desires us to both suffer and die, often cruelly. It is also often believed that the "true disciple" of Jesus will seek martyrdom.

A time to live
time to die

Yet if we look closely at the Bible, we find that this is not what it is saying to us. Paul, for example, though he was a man of courage, sometimes sought escape from danger. Shortly after his conversion, you will remember, he escaped a serious threat to his life by being let down in a basket over the wall of Damascus. There were other times too when he let his associates whisk him out of town just ahead of a hostile mob. If Paul had so much Christian courage, why didn't he stay and face these threats?

Paul probably chose to escape because he did not believe any purpose of God would be served by staying and risking death. Just as Jesus in the Garden of Gethsemane had sought to avoid death, so Paul did not desire to become a martyr. Human life is precious and the Christian is not expected to squander it needlessly.

On the other hand, in Acts 21 we find Paul determined to go to Jerusalem, even though the dangers before him are grave and evident. The difference is that Paul feels that God wants him in Jerusalem, not to die, but to perform a task for him. God does not will Paul's death, only his obedience. Still, it may be his obedience that makes his death almost inevitable.

Weakening my will

We must not assume either that this was "easy" for Paul. In Caesarea, his friends begged him to stay away from Jerusalem. Apparently, they were "getting to him," for at last Paul says in exasperation: "What are you doing, weeping and breaking my heart?" (21:13). The words, "breaking my heart," mean the same as "weakening my will" Thus, Paul indicates that they are breaking down his will.

There are two wills involved here: God's will and Paul's. Paul believes that God is calling him to Jerusalem–not to die, but to witness, even though that may bring death. God does not want Paul's suffering, only his obedience to witness. Having determined that that is God's will, Paul then brings his own will into harmony with the will of God.

Acts 21 tells us, "And when he would not be persuaded we ceased and said, 'The will of the Lord be done.'" This did not mean, "Do as you please," but "Do what God wants." Nor did they resign him to death. If that happened it would be, not God's will, but the will of men. There is a difference and they knew that difference. Do you?

NOW IS THE TIME . . .

Max Smith
County Agr. Agent
Telephone 394-6851

To Ensile Winter Grains

Numerous phone calls to our Extension Office reveal the interest in making winter barley and wheat into silage. This could be one of the best ways to store maximum feed value and still get the second crop from the ground. Some early barley will soon be ready to cut since the blossom to early milk stage is the best time to cut for good quality silage. The same will hold true for wheat and oats. Do not wait until there is a grain developed in the seed head because at this stage the stem and leaves have lost feed value. Field conditioning and wilting is desirable to reduce the moisture content and to get proper fermentation.

To Recognize The Danger Of Rabies

This dreaded infestion should be of concern to all producers and to all parents. The infection seems to be concentrated in bats, foxes, raccoons, and skunks. These animals may carry the disease over long distances without showing many symptoms. They usually show abnormal behavior by acting unusually tame and friendly, or they may be very ferocious and aggressive. In areas where there are known outbreaks all dogs and cats should be kept vaccinated against rabies. Youngsters should leave wild animal pets in the woods and not try to tame or play with them. Rabies can be carried to human beings through breaks in the skin by way of saliva from the infected animal.

To Beware of Wood Ticks

The tick season is approaching and all rural folks should beware of the danger of being bitten by the wood tick. These are often found in wooded areas and pets and children are commonly attacked. The danger from the tick bites is the they might carry Rocky Mountain Fever and cause serious illness in human beings. Dogs can be treated several times per week with Sevin and play areas, or wooded picnic areas, may be sprayed with Chlordane to eliminate the insect. All parents should warn their youngsters of this wood tick and might inspect their youngsters (around the head and hair line) after they've been out in the brush or wooded areas.

To Mow Pasture Fields

Many of the common pasture grasses will be shooting seed-heads in the next week or so. Also, weeds will be maturing and coming into bloom. This means that the area should be mowed. This will stop weed development and will encourage new growth from the grass roots. The old grass will dry and many animals will eat it as hay. All land owners with pastures or with vacant lots are urged to control weeds. Real estate developers also have a community obligation to keep their weeds from going to seed and blowing throughout the community. Weed control should be everyone's responsibility.

Farm Calendar

Saturday, May 18

10:00 a.m. – Blue Ball Lions Club Community Sale at East Earl Twp. Bldg.

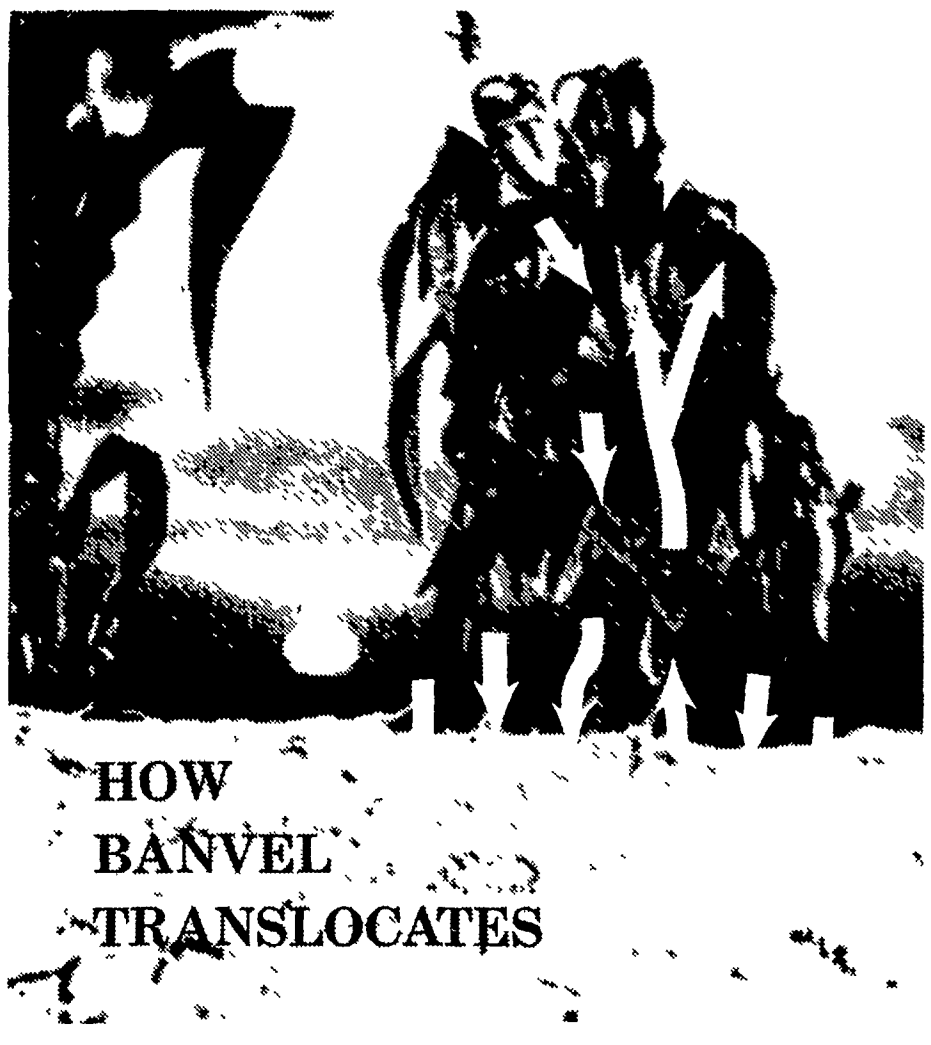
THISTLE?

BANVEL® Herbicide

POST-EMERGENCE APPLICATION IN FIELD CORN GETS TO THE ROOT OF YOUR TOUGH BROADLEAF WEED PROBLEM



HOW BANVEL TRANSLOCATES

Your corn crop is well along. But tough, deep-rooted weeds threaten to take over. The earlier you spray Banvel, the better, preferably before hot, humid weather.

Even though you spray over the tops of corn, normally no brittleness develops. If you see velvetleaf or pigweed, a lower rate of Banvel mixed with 2,4-D will give most effective control.

Banvel works! For one simple reason. Banvel translocates. Absorbed by leaves, stems, roots, Banvel moves with plant fluids from leaf tip to root tip. Destroys as it goes. So, no regrowth.

In permanent pasture, Banvel gives you easy control of more than 40 of the most common weeds, including wild garlic, weed brush and weed trees.

Cost of Banvel? Up to $1.90 per acre broadcast in corn. Ask your dealer or custom sprayer for full information.

LEBANON COUNTY DHIA MONTHLY REPORT

A cow in the herd of Robert Lentz completed the highest lactation. 62 produced 22,269 pounds milk, 884 pounds butterfat, with a 4.0 percent test. Second high lactation was completed by a cow in the herd of Raymond N. Getz. Gloria produced 20,065 pounds milk, 788 pounds butterfat, with a 3.9 percent test.

Again, the herd of Dale E. Hostetter had the highest daily butterfat average. This herd of 71.0 cows averaged 52.5 pounds of milk, 2.07 pounds of butterfat, with a 3.9 percent test. The herd of Robert Martin placed second with an average of 51.2 pounds milk, 2.04 pounds fat, with a 4.0 percent test.

Growing Degrees, Rainfall

A report from Penn State of weekly crop and weather round-ups with a report on weather conditions for the week ending May 13.

In Lancaster, the average temperature for the week was 55 degrees, 5 degrees below the normal average for the time of year.

Growing degree days for crops that start at 40 degrees totaled 617 degree days of 81 more than the normal average. For crops starting at 50 degrees growing degree days totaled 243, which is 81 more than average.

Rainfall for the week was 2.43 inches. Rainfall measured from April 1 was 7.80 inches, 2.58 inches more than the normal average.

Meat Alternate

The saying—"the meal is planned around the meat"—does not mean you have no meal if you don't serve meat. Certainly, meat is a good protein food and excellent basis for planning meals. But, Penn State Extension foods and nutrition specialists remind you that other foods such as dried beans, dried peas and nuts are also sources of protein.

For more buying and serving information on dried beans, dried peas and nuts, and other foods necessary for good helath, write to: FOOD, Trudy Dougherty, County Extension home economist, 402 North Wing, Courthouse, West Chester, Pa. 19380.

CONTROL WEEDS IN ALFALFA WITH

BUTYRAC-118

Apply 2 to 4 weeks after alfalfa emerges. Controls broadleaf weeds in seedling or established legumes. This remarkable selective action — killing many broadleaf weeds without affecting certain broadleaf crops — has been proven by research men and commercial growers throughout the country.

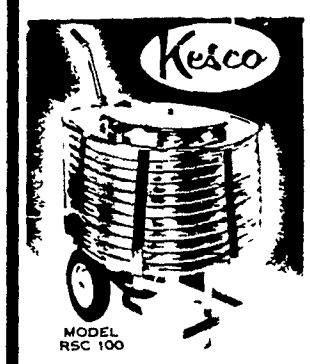
We are distributors for a complete line of

MICHEM

WEED KILLERS

P. L. ROHRER & BRO., INC.

Smoketown, Pa. 397-3539



A MILKMOVER SYSTEM gets you out of the barn sooner - with more money in your pocket! It saves your lugging heavy pails of milk from barn to cooler

- HAS MORE MILK CAPACITY
- PERMITS FASTER MILKING
- ELIMINATES EXTRA HELP
- PROTECTS MILK QUALITY
- IS 100% SELF CLEANING
- HAS ELECTRIC CONTROLS
- FITS INTO ALL BARNS
- EASILY INSTALLED

Available thru your local dairy equipment dealer or call the factory collect to arrange for a free demonstration on your farm.

USDA Proposes Change In Hog Shipping Rules

The U.S. Department of Agriculture proposed regulations which would require the identification of all swine shipped across state lines. The eradication of swine dieases depends on being able to trace infected or exposed animals found in market channels to their herd of origin.

Officials of USDA's Animal and Plant Health Inspection Service (APHIS) siad the proposed change in interstate shipping rules would require slaughter hogs to be identified with an approved tattoo and breeder and feeder hogs to be identified with eartags or other approved methods.

Veterinary Services (VS) of APHIS has developed approved slap tattoo codes which would be assigned to owners, market agencies, dealers, meat packers, and other persons upon application to the State animal health officials of the APHIS area veterinarian in charge. Approval may be granted for tattoo coded systems presently used that provide the necessary information to allow for traceback of swine to their herd of origin.

Slaughter hogs could be tattooed prior to interstate shipment by the owner, trucker, marketing agency or dealer. Hogs moved directly from a herd of origin could be tattooed at either an inspected slaughter plant or a stockyards posted under the Packers and Stockyards Act. In either case, these hogs would be tattooed before being mingled with other hogs.

Feeder or breeder swine shipped across state lines would be identified with APHIS approved eartags and accompanied by a document stating the farm origin, number of animals and eartag numbers, destination, and name and address of the owner or shipper. Eartag identification would not be needed for purebred breeding stock if the accompanying document showed that they were identified in a way acceptable to the breed registry association.

Feeder and breeder swine moved interstate direct from a farm of origin could be eartaged upon arrival at a stockyards posted under the Packers and Stockyards Act, provided they were eartagged before being mingled with other swine. Swine assembled from more than one scource or farm would not be mingled as movements direct from a farm and would be eartagged prior to mingling with other swine.

Finally, the proposal would place responsibility for identification devices until slaughtered except as authorized by the Deputy Administrator for APHIS' Veterinary Services. It is also requested that records of the tattoo identification of slaughter swine and documents accompanying the interstate movement of feeder and breeder swine be made available for inspection for one year.

The proposal is scheduled to be published in the Federal Register on May 10, 1974. Interested persons will have until Aug. 12, 1974 in which to file written data, views or comments. These should be sent to the Deputy Administrator, Veterinary Services, APHIS, USDA, Federal Building, 6505 Belcrest Road, Hyattsville, Maryland 20782. All written comments received will be available at the location for public inspection during regular business hours.

Meat Slaughter Drops in Pa.

Pennsylvania was down in meat production for all species except sheep and lambs, according to the Crop Reporting Service. Cattle slaughter decreased four percent, calf slaughter 25 per cent and hog slaughter 25 per cent from a year ago. Sheep and lamb salughter was up 39 per cent from March a year ago.

Nationally, total red meat production was up four per cent from a year ago and 16 per cent more than in February Beef production was five per cent more than March 1973 pork two per cent more, lamb and mutton 10 per cent more while veal production was down six per cent from a year earlier.

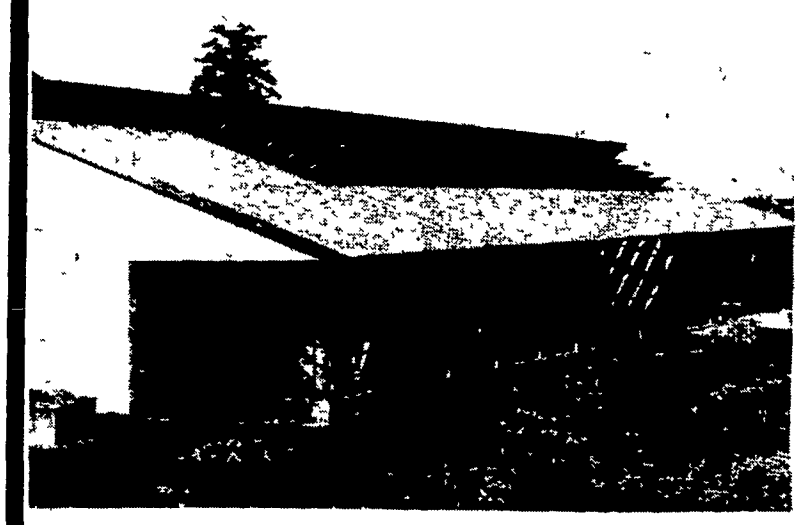
PUT YOURSELF INTO THE FUTURE!

LET THE SUNSHINE IN WITH...

SOLAIR SYSTEMS



SOLAIR COW BAY WITH THE "SUN SENSOR"

FEATURES THE FOLLOWING:

1. Storm-and fire-resistant construction.
2. Rapid evaporation and dehumidification through "solar thermo" circulation.
3. Engineered for expansion.
4. Designed for either beef or dairy cattle.
5. Straight line scrape areas.
6. "Quick dry" floor areas.
7. North side ventilation — summer only.
8. Three sided wall structure — open South.
9. "Jalousie type" Southern roof provides direct sun rays on 80 per cent of floor — OPTIONAL.
10. "Sun Sensor" control automatically opens and closes optional jalousie roof for maximum winter comfort.
11. Complete herd grouping accommodations.
12. Automated feed control.

WE'RE INTERESTED IN ECOLOGY!

With our completely covered lots and a sun roof with an open peak, rain water does not enter the bay area and maximum evaporation of animal liquids is obtained. An "all-drained" floor system is installed and a curbed fence line keeps manure in place to be scraped into a liquid pit or a push-off loading system. By preventing manure run-off the surrounding area is not polluted.

Yes, since your urban neighbors and government fathers are interested in ecology, we are ready to help you build a system that will put you ahead on the pollution problem.

And, low moisture levels in Solair Systems results in less bacteria action and fewer odors.

The one feed additive for growth and feed savings plus 4 way control...

AUREO S·P 250®

In our feeds helps you control

★ ATROPHIC RHINITIS
★ SCOURS
★ CERVICAL ABSCESSES ★ STRESS

AUREO S•P 250* has proved to be the one feed additive that provides a wide range of benefits to pork producers. No other antibacterial in feed does so many things to help produce fast gains — improve feed efficiency — and provide superior protection against the major diseases that threaten sows and growing hogs.

AUREO S•P 250 helps save feed — reduces labor and medication costs — by keeping hogs gaining in the presence of atrophic rhinitis, controlling bacterial scours, reducing cervical abscesses — and helping prevent these diseases during stress.

AUREO S•P 250 is beneficial at every stage of growth and production.

*AUREO S•P 250 is the registered trademark for American Cyanamid Company's premix of AUREOMYCIN® chlortetracycline SULMET® sulfamethazine and penicillin Withdraw seven days before slaughter

Plain & Fancy Celebrates Eighth Anniversary

Lunch and refreshments were served to all employees on the occasion of Plain and Fancy Egg Ranch's 8th Anniversary. Mr. Henry Bowman and Mrs. Gloria Sweigart received awards for the most years of service. The company wishes to express its appreciation to all employees who are responsible for its continued growth and success.

Plain and Fancy employs one hundred fifty-five personnel and has egg production in five countys. All eggs are processed and marketed in a seven state area.

Plain & Fancy has been a consumer oriented company in egg merchandising and educating Mrs. House Wife with the nutritional value of eggs and the need in our daily diets.

Officers of Plain and Fancy Egg Ranch, Inc. are shown above with cakes commemorating the eighth anniversary of the firm. Pictured left to right are Paul Hess Jr., vice president, John Snader, treasurer, Paul Hess Sr., president and Claude Hess, secretary.

Tax Loss Ceilings Affect Few Farmers

Few farmers would be affected if recent proposals limiting the amount of arm loss which can be used to offset nonfarm income were made law, according to a recent publication issued by the U.S. Department of Agriculture (USDA). However, added tax liabilities could substantially increase Federal income tax revenues.

USDA's Economic Research Service studied the effect of limiting farm loss to $10,000, $20,000, and $30,000, since many tax reform proposals suggest similar cutoffs. Limiting farm loss to $10,000 would have meant higher taxes for 3.3 percent of the 1.3 million individuals reporting a farm loss in 1970, adding $258 million in Federal tax revenues. A $20,000 limitation would have affected 1.2 percent of the loss returns and boosted tax revenues by $166 million. And a $30,000 limitation would have affected 0.6 percent of farm loss returns, raising $122 million in revenues.

The report also discusses characteristics of farm loss returns. For instance, more than 90 percent of reported farm losses were under $50,000 in 1970, while 3 percent were $25,000 or more. Individuals reporting losses represented 43 percent of the total number filing farm tax returns in 1970. This percentage has been trending upward in recent years.

Single copies of "Tax Loss Farming," ERS-546, are available free on postcard (please include zipcode) or telephone (447-7255) request from the Division of Information, Economic Research Service, U.S. Department of Agriculture, Washington, D.C. 20250.

STANFORD TRIPLE "S"
Sorghum-Sudangrass Hybrid

GREAT WAY TO STEP UP LIVESTOCK FEED PRODUCTION

CHECK THESE ADVANTAGES

All over the country there has been a booming demand for fast-growing high-yielding annual forage grasses to boost livestock feed production TRIPLE 'S' is one crop that is filling this need Here in summary are some of the advantages of this exceptional sorghum-sudan-grass hybrid

COMES UP FAST
establishes easily needs no special pampering

SPEEDY RECOVERY
can be pastured or cut frequently

TREMENDOUS YIELDS
up to 50 percent more forage than some common sudangrass varieties

PALATABLE
your livestock will love it

NUTRITIOUS
high in Protein, TDN value

HIGHER CARRYING CAPACITIES
big yields can mean more cattle per acre

STRONG STALK
stands up well to heavy winds

USES FULL GROWING SEASON
takes advantage of full yield potential when used for silage

HIGH LEAF RATIO
leaves are large, plentiful, cover full plant height

Available through Stanford Seed Company Dealers

PURINA CHOWS ®

From Local Ag Teachers:

Thoughts in Passing

The article this week was prepared by Glenn Weber, teacher of agriculture, Manheim Central High School.

FOOD — A BARGAIN IN DISGUISE

Food prices on an absolute scale have risen over the last years As one consumer stated, "Food prices are so high that they are burning holes in the pockets of the consumer."

I'd like to consider three main areas of the food price problem. First, who is to blame for high food prices? Secondly, why have prices risen as they have, and finally, what can we as consumers do to adjust to these new prices?

As a teacher and farmer, I have had an opportunity to witness the farm and food price controversy from both sides. I have been appalled at the apparent lack of knowledge of the producer's point of view on the part of both the urban consumer and those who have tried in the past to administer price controls.

In the early part of 1973 farm prices started to increase. In January, February, and March farmers began to respond to these higher prices the way they had responded to price increases before -- by gearing up to produce more food and fiber than this country could ever consume. Then by last March and April something changed the

Glenn Weber

farmers response to these higher prices. The consumer became impatient. We started to hear about food price freezes, boycotts and consumer organizations against the food producers for lower prices. May I suggest that those consumer groups responsible for the upheaval last April and May really didn't understand our food marketing system. They thought that in 2 or 3 months a farmer could increase his supply of meat to the food stores. But as we know, two to three months is just not ample time for farmers to keep back heifer replacements, breed and calve them, feed out the calves and send the cattle to market, slaughter them and put the products on the supermarket shelf. The calves that are now following their mothers in the hills of Virginia, West Virginia, Kansas and elsewhere will be the products in the supermarket in a year and a half from now. Because they didn't understand agriculture, we had a number of boycotts, freezes, ceilings and intimidations from the consuming public. What they didn't know is that we could not pass a law and increase the beef on the supermarket shelf next week. We could not increase the meat supply by freezing beef prices anymore than we can solve teacher shortage with a ceiling on teacher wages. All the freezes, ceilings, and boycotts did was to discourage the farmer and widen the gap of understanding between the producer and consumer.

Well, who is to blame? The farmer claims his costs of production have more than doubled in the past ten years while his prices paid to him have not. The consumer claims that it is impossible

FREY FREE STALL
LIFETIME FREE STALL HOUSING

Cut bedding costs 75 per cent, reduce labor for barn cleaning and cow washing; reduce teat and udder injury to the minimum — house your milking herd in free stall housing. Each cow provided a stall for loafing. She won't be stepped on, the rear curb forces manure out into alley for mechanical cleaning or washing. A few minutes twice a day cleans the stalls and curbs, bedding lasts almost forever if your stalls fit the cows. Popular sizes are 6'6", 7' and 7'6". Size 'em by breed.

Our free stall-partition may be mounted on wooden head boards or we make a steel divider. Set the legs in 8 to 10" concrete curbs to hold and retain bedding Stall floor can be soil, sand or gravel. Bedding — straw, sawdust, peanut hulls, ground corn cobs, etc. Should be installed with paved alley surface 8 feet wide for mechanical cleaning or washing

- 8 Models all steel welded farm and feedlot gates
- 2 Models all steel welded head catch gate

Thoughts

[Continued from Page 16]

that he has caused the high food prices. Finally the middleman, claims that if his profits margins were cut, he will be forced out of business causing our ag marketing system to fail. Let's consider another option – a combination of causes resulting in higher absolute food prices today.

Number one - higher prices today are a result of our past success to reduce production of farm grains. The land bank program and the crop allocations program have decreased grain porudction as well as grain surpluses. Just a decade ago our surplus of the four most important feed grains fed to livestock (corn, oats, barley and sorghum) in government hands totaled 75 million tons. That would be 3000 ship loads. No wonder everybody thought we could feed the world – surplus grains are now virtually depleted.

Secondly, world food production has not kept pace with world demand in recent years. There have been severe drought problems in the Soviet Union, the world's largest wheat producer. The result was the big wheat deal to the Russians. The U.S. sold 19 million tons of wheat to Russia which triggered the big price rise in grains. High priced grains led to higher prices for many foods.

There also has been a sharp increase in demand for food by the other developed nations of the world. We are in era when other countries are beginning to compete in our food markets. There are two general reasons for this; first the wealth and standard of living of other developed countries has continually been rising and is now to the point of competing on our food markets. As personal incomes in the developed countries increase, their citizens demand a better diet, more meat, milk and eggs. In the poor countries the per capita consumption of grain is about 400 pounds per year and nearly all of it is consumed in some form of grain. But in the U.S. we each consume one ton of grain - most of it in the form of meat, milk and eggs. The recent devaluation of the dollar also makes it cheaper for other countries to buy our food products.

If exporting is causing us high food prices than why export? The dollar is one reason. Since 1971 we have been buying more from other countries than they have buying from us causing a balance of payment deficits. In fact 9 billion more dollars flowed out of our country than in. Agriculture crops and products are used then to balance the trade deficit. Without an aggressive export program for ag products the nation's balance of payments problem would be unbearable.

Thirdly, wages have dramatically increased in the past 20 years. We have been experiencing an inflationary spiral which has put more cash into circulation creating a stronger demand for food products. When we have more money to spend some of us tend to buy more causing food prices to rise. For example, in 1950 the average person consumed 63 pounds of beef in 1973 118 pounds of beef were consumed.

But food prices have risen only minimally in comparison with wages and salaries as well as other things one buys. From 1947-1972 food prices rose 74.9 percent while the upkeep cost of an automobile rose 91.0 percent and the total overall cost of living rose 87.3 percent. More importantly the increase in disposable income rose 223 percent during the same period. Food prices have only gone up one-third as much as wages.

Despite all the talk about high food prices in the U.S. on a comparative basis food is cheaper here than anywhere in the world. If I could take you to Tokoyo to purchase their best grade of sirloin, it would cost us $10.50 per pound and ground beef is $2.60 per pound that is – after it has suffered a trip across the Atlantic from the U.S. A 4 pound roast would cost us $27.00. When one store was selling a "super special" cut at Tokoyo's best meat market for $34.50 a pound, one foreign journalist commented, "Beef is now somewhat more expensive than silver here in Japan."

When considering food prices in relative terms, they appear lower today than ever before in our history One hour's work in a factory buys more food today than it did 20 years ago.

In 1930 an American spent 24 percent of his income for food products, in 1940 22 percent in 1960 20 percent, in 1971 15.8 percent, in 1972 15 7 percent and in 1973 15.5 percent. That is the lowest in history. Not only are we as consumers spending a smaller portion of our income on food, but that smaller portion of our income now buys more. The convenient pre-cooked foods and ready-made products dominate the supermarket shelves. The result is more for the housewife's money and less work for her. By way of comparison, England spends 25 percent of their income on food, Japan 35 percent, Russia 58 percent and in Asian countries 80 percent compared to our 15.5 percent. And all that 80 percent in Asian countries buys is a chicken hanging by the neck in the market place for a few days. And when you spend 80 percent of your pay for food you don't have much leftover. When Americans spend only 15.5 percent of their income for food the remainder is used for the enjoyment of that second car, vacations, and that beautiful home in he coun-

Thoughts

(Continued from Page 17)

try. Did you realize that by 4:00 p.m. on Monday most Americans have earned their week's supply of food?

Yes, in the past 25 years food prices have increased, but of the increase farmers have gotton only fifteen percent while the other 85 percent was gobbled up by processing, wholesaling and retailing the products that the farmers produce. To comfort those who think the farmers are on easy street since 1960 we lost 100,000 farmers per year. And they didn't leave because farming was so profitable. One high official went on TV during last year's meat boycott and said, "Farmers have never had it so good – They're crying all the way to the bank." If he knew anything at all about farming he would have known why they were crying and why they were going to the bank. Since 1960 the farm debt has gone up 400 percent. Last year Congress said $1.60 per hour was poverty and yet the average farmer gets only 81 cents per hour figuring his returns to labor the way businessmen figure their returns and that is nothing to be proud of – but it's fact, not fiction!

If the farmer gave his corn away a 32 cent box of cornflakes would cost 2.8 cents less. The box costs more than that and I haven't heard anybody complaining about the high price of boxes lately. The trinket in the box costs more than the corn.

Once consumers and politicians recognize that food is a bargain and let the free enterprise system of the law of supply and demand work and when they realize that producers are the heroes and not the villians in our fight to be a productive nation, farmers will then be able to concentrate their efforts on what they know best – producing high quality food and fiber at low costs. The problem is one of understanding between the producer and the consumer.

Hopefully, this article has resulted in a greater understanding of the food price problem. Beyond understanding there are some definite actions that you can take to keep your food bill lower – to ease the strain on your purse.

1. Don't go food shopping when you are hungry or in a hurry. You'll ruin those carefully made grocery purchases with impulse buys.

2. Be a coupon user, but buy only those products that you will be using.

3. Buy frozen and canned fruits whenever possible. Remember there is no waste with frozen foods.

4. Purchase from the marked-down sections which contain day-old and-or blemished goods. For example, bananas for banana cake don't need to be in top shape.

5. Be flexible when shopping. Try to get whatever is on sale. Don't be afraid to change and try a new taste to save money. Buy substitutes for produce which you are using to only add color to a meal if they are lower priced.

6. Use more carrots - carrots are one of the great underused fresh vegetables that are often a bargain. There are all kinds of recipes for carrots. Don't peel them; scrub them. You're throwing away the most important nutritious part of the carrot when you peel it.

7. Buy in quantity. Many families can buy their potatoes in 100 pound bags as well as other food products.

8. When buying fruit always select the heaviest. This is generally your freshest fruit and will result in more for your food dollar.

9. Shop around; find supermarkets which have the best prices.

10. Buy and utilize a freezer. Here's how. Figure 5 to 6 cubic feet of freezer space for every member of your family. Meat is the biggest item in almost any food budget and here is where your freezer can help. Shop for meat specials and keep them in your freezer until you wish to use them. Cooperate with other families in buying a beef animal directly from a farmer and dividing it in mixed quarters. Freezers also make possible gardens to supply food from your own land throughout the year – or buy vegetables in season.

Food still is the country's biggest bargain and by following these few simple shopping reminders it can ever be a bigger bargain for you!

Wheat Production Up 60 Percent

Pennsylvania's winter wheat production is expected to total 11,900,000 bushels, up 60 percent from last year, according to the Crop Reporting Service. The May 1 yield forecast of 35 Bushels per acre is well above the 28 bushels last year. Harvested acreage is expected to total 340,000 acres, up 29 percent from last year and the highest since 1968.

The revised production of the 1973 tobacco crop is set at 22,100,000 pounds, harvested from 13,000 acres. This compares with the 1972 production of 18,200,000 pounds from 13,00 acres. Average price per pound for the 1973 crop was 52 cents compared with 46 cents in 1972. Hay stocks on farms May 1 totaled 876,000 tons, 30 percent above the same date a year ago, but 4 percent below 1972.

Spring plowing in the central and southern parts of the state passed the midway point by the end of April. Oats seeding was near completion statewide and corn planting was underway in the southeast. The condition of hay fields is mostly good. A few farmers have turned animals out to pasture, but pasture growth has been slowed by cool weather. Potato planting is well underway statewide. Tobacco beds have been seeded and plants are coming up. A few acres of green peas have been planted.

Below freezing temperatures in most of the state May 8 caused damage to all fruit crops. The damage varies considerably by variety and location. Orchards in low lying areas where air drainage was restricted appear to have been hardest hit. However, a full assessment of the total damage cannot be made at this early date.

Statewide, peaches appear to have been hit the hardest. Damage was more severe in the central counties. Strawberries also suffered damage.

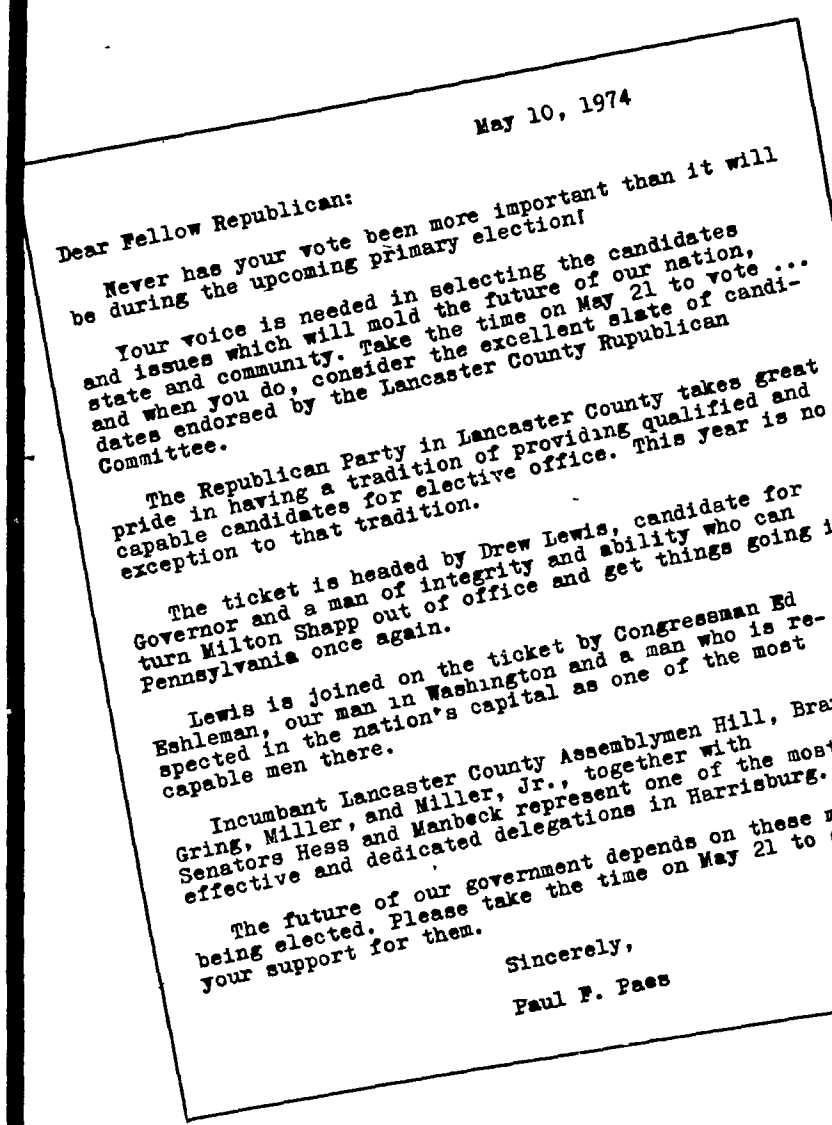
AN OPEN LETTER TO

LANCASTER COUNTY REPUBLICANS:



May 10, 1974

Dear Fellow Republican:

Never has your vote been more important than it will be during the upcoming primary election!

Your voice is needed in selecting the candidates and issues which will mold the future of our nation, state and community. Take the time on May 21 to vote ... and when you do, consider the excellent slate of candidates endorsed by the Lancaster County Rupublican Committee.

The Republican Party in Lancaster County takes great pride in having a tradition of providing qualified and capable candidates for elective office. This year is no exception to that tradition.

The ticket is headed by Drew Lewis, candidate for Governor and a man of integrity and ability who can turn Milton Shapp out of office and get things going in Pennsylvania once again.

Lewis is joined on the ticket by Congressman Ed Eshleman, our man in Washington and a man who is respected in the nation's capital as one of the most capable men there.

Incumbant Lancaster County Assemblymen Hill, Brandt, Gring, Miller, and Miller, Jr., together with Senators Hess and Manbeck represent one of the most effective and dedicated delegations in Harrisburg.

The future of our government depends on these men being elected. Please take the time on May 21 to show your support for them.

Sincerely,

Paul F. Paes

DREW LEWIS
Governor

KEN LEE
Lt. Governor

ED ESHLEMAN
Congressman

RALPH HESS
State Senator

CLARENCE MANBECK
State Senator

English Tour

[Continued from Page 1]

average was 600 acres, with the largest, a father-son operation, amounting to 3000 acres. The smallest farm represented was 320 acres.

Cash crops and small grains were the main farming enterprises represented by the tour group, with some beef, dairy, sheep and poultry, also.

While the acreage might astound most Lancaster County farmers, they would no doubt be even more astounded by the size of the machinery the U.K. farmers use. Nicholas Walshaw, part of a family which farms 1500 acres in Essex County, remarked that they did the bulk of their work with a single 45-horsepower tractor. The plant, fertilize and spray their wheat, barley and lucerne with this tractor. They have a larger machine for plowing, but use only a two-bottom plow.

"We've got to be a little more careful," Walshaw said, "about the size of our equipment. Petrol costs more in the U.K. and we try to match the size of the machine with the size of the job. Here you have few tractors under 100 horsepower. We have few tractors over 100 horsepower."

English farmers seem to be facing the same kind of pressures that Americans are experiencing, only more so. "Last winter we finally began to get a good price for beef," we were told by W. S. Elkington, who farms 1000 acres in Lincolnshire. "Do you know what the Prime Minister did? He went on television to tell the people not to eat beef. He told the people to boycott beef. I bought calves for about $130 American dollars. Now, after a year of feeding them, I can't even sell them at the same price I paid for them. We had good beef prices for ten weeks, and then the bottom fell out."

Elkington was even more empathic on the subject of inheritance taxes. He said inheritance taxes are levied at the rate of 90 percent of a property's value upon the owner's death. "That makes it difficult to pass a farm onto the next generation, don't you think?" he said.

The tour group left Brubaker's farm for Robert Rohrer's farm in Washington Boro, then to Turkey Hill Farms in Conestoga. In the morning, they had visited Naamin King's farm in Atglen. On their tour, they'll be stopping at farms and other points of interest from New York in the north to Goldsboro, North Carolina, in the south.

FARM TRENDS

[Continued from Page 1]

seen at 45.8 million acres, up nearly 20 pct. from last year and the highest since 1952. Yield per acre is seen at 35.2 bu. per acre, up from last year's 33.1 bu. If realized, it'll top the 33.9 bu. per acre posted in 1971.

MILK PRODUCTION DOWN FOR 17TH STRAIGHT MONTH

U.S. milk production continues down. April output, at 10.1 billion lbs., was off 2.3 pct. from a year earlier. This also marked the 17th consecutive month that production has been below that of a corresponding month a year earlier.

Milk production per cow during April totaled 901 lbs., up from 899 lbs. in April 1973. Milk cows on farms, at 11,190,000, were down 3 pct. from a year earlier.

Sharpest declines from year ago totals were in Louisiana and Ohio, both down 8 pct. April output was off 4 pct. from a year earlier in Wisconsin, down 2 pct. in New York. But, it was up 3 pct. from a year earlier in California, up 1 pct. from a year earlier in Minnesota.

The Jan. - April total, at 38.0 billion lbs., was down 2.8 pct. from a year earlier. (Milk Production).

U.S. FERTILIZER USE UP 4 PCT. IN '73

U.S. fertilizer consumption up during year ended June 30, 1973, USDA reported last week. At 43.1 million tons, total was 4 pct. above a year earlier. Consumption of primary nutrients -- nitrogen, phosphate, potash -- totaled 17.8 million tons, compared to 17.2 million tons in 1972. Nitrogen consumption, at 8.2 million tons, was up 2 pct.; phosphate, at 5.0 million tons, was up 5 pct.; potash use, at 4.6 million tons, was up 7 pct.

Among the leading States, consumption in California (3.5 million tons) was up 3 pct. Illinois' total (2.9 million tons) was off 1 pct. Totals in Iowa (2.66 million tons) and Texas (2.56 million tons) were up 2 pct. Georgia's total (2.15 million tons) was up 8 pct. (Commercial Fertilizers).

Land Judging

[Continued from Page 1]

Others in the top ten, listed in order, were: Gordon Herr, Solanco, 414 points; Rick Gensemer, Ephrata, 396; Jim Felpel, Ephrata, 383; Charles Coates, Solanco, 354; Randy Hummer, Ephrata, 352; Joe Overly, Solanco, and Daryl Nolt, New Holland, both with 350; and Randy Ranck, Solanco, 340.

The winning Solanco team consisted of Hohenwarter, Herr, Coates, Overly and Ranck. Scores for the top five teams were: Solanco, 1890; Ephrata, 1887; New Holland, 1615; Manheim, 1467, and Lampeter-Strasburg, 1375.

Solanco FFA To Hatch Pheasants

For the third year in a row, Solanco FFA in cooperation with the Southern Lancaster County Sportsmans Association will be hatching and raising pheasants.

Any farmer finding pheasant eggs may contact members in the following townsip or call the Solanco Ag Dept. at 786-2151. Ext. 52:

Colerain: Joe Winters, 529-2916 or Lee Ferguson 529-2251.

Eden: Jeff Glackin 786-7198 or Scott Heckel 687-6021.

Little Britain: Tom Jackson 529-2418 or Charlie Coats 529-2537.

Drumore: Marshall Trimble 548-2278 or Dave Hanks 548-2493.

East Drumore: Bruce Kreider 786-2626 or Jim Kantz 548-2427.

Fulton: Jeff Rutt 548-2469 or Tom Calbreath 548-2576.

New Providence: Mark Howenwater 284-4274 or Ken Wiker 284-4505.

Bart: Glenn Reinhart 529-2846 or Harold Keene 529-2135.

After eggs are delivered to these check points, they will be taken to the incubator which is located at the farm of Robert Zander. After hatching they will be taken to another member, Joe Winters, who will feed and care for them until they're old enough to be set free.

They will be released in the area from which the eggs were found.

Feed for this project is being supplied by Anderson's Feed and Grain Service, Oxford.

Jeff Rutt,
Chapter Reporter

4-H NEWS

Fredericksburg 4-H Club

A meeting of the Fredericksburg 4-H Community Club was held in the home of Mr. and Mrs. Harold Sweinhart, Fredericksburg RD1, Monday.

Ten Members with Mrs. Bernard Brandt, Fredersicksburg RD1 and Mrs. Sweinhart, adult leaders, attended the meeting.

Election for office was held.

Elected president was Arthur Sweinhart; vice president, Steve Wolk; sercretary, Rose Brandt; treasurer, Debbie Gingrich; news reporter, Scott Morgan; game leader, Shawn Hernley.

Everybody decided what projects they would do for 4-H. Refreshments were served by Mrs. Sweinhart and Mrs. Brandt.

The meeting was conducted by Mrs. Brandt. The next meetng will be held June 17 in the home of Harold Sweinhart, Fredericksburg RD1.

Elcoettes 4-H Club

The first meeting of the new Elcoettes 4-H Club was held in the home of Mrs. Helen Ginder, Schaefferstown, recently.

The meeting was called to order by Kim Balsbaugh, last year's president. The pledges were then recited. Nineteen members and two adult leaders, Mrs. Helen Ginder and Mrs. Janis Horst, were present.

Members discussed a name for the new club. Two suggestions were made and the members voted to adopt the Elcoettes name since that club disbanded.

The next business was election of officers. They are: president, Kim Balsbaugh; vice president, Doreen Ginder; secretary, Shirley Kline; assistant secretary, Kim Smith; treasurer, Connie Horst; news reporter, Michelle Ginder.

Assistant news reporter is Anita Ginder; game leaders, LeAnn Mock and Robin Robson; song leaders, Debbie Boyer and Doreen Ginder.

Enrollment sheets were filled out and projects were discussed. The next meeting will be held May 25, in the home of club leader Helen Ginder.

Strack's Dam Stitchers Club

The Strack's Dam Stitchers Club met at the home of Mrs. Louella Hummel, Lebanon, this week to continue work on sewing projects.

Members decided to make their own pin cushions instead of purchasing them. Each member made her own patttern and learned how to back-stitch them together.

All of the members also learned how to thread the sewing machine without any help from the leaders.

Eight members were present. Adult leaders are: Mrs. Louella Hummel, Mrs. Joan Dundore, Mrs. Elsie Atkins, Mrs. Jane Hain, and Mrs. Carolyn Umberger.

In charge of refreshments for the evening was Wanda Hain, after which Karen Dundore led the group in songs and games.

Solanco 4-H Club

The Solanco Community 4-H Club met on Friday, May 10 at 7:30 p.m. at the Mechanic Grove Church of the Brethren.

New officers were elected at that time. They are: Jane McSparran, president; Donna Akers, vice president; Barbara Aaron, secretary-treasurer; Lisa Thompson, assistant secretary-treasurer and news reporter, Jon Bitler and Denise Eckman, game leaders; Joan Cunningham and Kim Weaver, song leaders

The next meeting will be held on June 14 at 7:30 p m at the Mechanic Grove Church of the Brethren A softball game will be held before the meeting

Any boy or girl from 8-19 years of age is invited to attend

Categories that can be pursued by members include interior decorating, capons, sewing, cooking, and vegetables gardening

For further information call 786-7117,

Lisa Thompson,
News Reporter.

"Liquid Bread"

Bavarians call beer "liquid bread," and in 1973 they drank about 60 gallons per person, nearly 60 percent above the national average for the Federal Republic of Germany

Energy user

The average family car consumes about 6,000 pounds of petroleum products a year

E-Town Donegal

The Elizabethtown-Donegal 4-H Community Club meeting was held at the home of Sharon Hess.

The meeting was called to order by the president, Jeff Swarr. This was followed by the secretary's and treasurer's report which were followed by the old and new business.

The program featured slides shown of the 4-H Awareness Team and a few comedy films.

Refreshments were served after the meeting.

The next meeting will be ice cream party on June 6 at the home of Pam Wivell, RD1, Columbia, Pa.

Lebanon County 4-H Officers Workshop Held

About 150 4-H officers from various 4-H clubs throughout Lebanon county attended the annual 4-H Officer Training Workshop May 7 in the Lebanon Municipal Building.

Following a general meeting where Denis Hoke, Associate County Agent, introduced workshop instructors, the officers split into various groups.

Presidents and vice presidents were taught parliamentary procedures and other items by Glenn Kreider and Ernest Risser, both former 4-H presidents. The secretaries were instructed by Julia Woods and Kim Balsbaugh, also members of 4-H clubs.

Richard Krall, a former club treasurer, instructed the treasurers in the proper procedures of recording and reporting the financial status of the club.

Tim Aurentz, County News Editor, Lebanon Daily News, instructed the club reporters in the proper way to write a news story.

The song leaders were instructed by Amy Schaffer, and the game leaders or social chairmen were taught by Connie Horst and Pat Moore, all three are either former or present members of 4-H clubs.

Following the sessions, the officers regrouped and workshop reports were given. Refreshments were served after the meeting.

Falcons Fashion Food & Fun Club

Falcon's Fashion, Food and Fun Club held its election of officers Monday at the home of Mr. and Mrs. John Munnion, 914 E. Evergreen Rd., Lebanon.

The new officers are: Tammy Engle, president; Cathy Munnion, vice president; Tina Shutter, secretary; Lori Messersmith, assistant; Kendra Munnion, news reporter; Alice Wenger, assistant news reporter; Shari Engle, treasurer; Sheri Bowman, assistant treasurer; Lisa Ryan and Dannette Engle, co-song leaders; Vicki Martel, game leader; and Carol Munnion, assistant.

Sixteen members, two leaders, and four new members attended. The new members are Shari Engle, Dannette Engle, Tina Shutter, and Brenda Martel.

The next meeting will be held May 20 in the home of Mrs. Grimes, 2 Linden Road, Lebanon.

Refreshments were served by Vicki Martel, Brenda Martel, and Alice Wenger. The meeting was concluded with some games.

Ayrshire, Jersey Brown Swiss 4-H

The Ayrshire, Jersey, Brown Swiss 4-H Club met Monday, May 13, at the home of J. Rohrer Witmer. A presentation was given by Alan Bair, Associate County Agent, on the qualities of a good dairy cow, and how to judge them. Linda Witmer gave a demonstration on preparing your animal for the round-up.

It was decided to hold the annual joint meeting at Muddy Run Park, August 12, instead of at the Farm and Home Center, which was previously announced.

The club members would like to challenge the Guernsey and Holstein Dairy Clubs to a calf dressing contest at the 4-H Round-up. The theme will be cartoon characters.

The next meeting will be held on June 10, at the home of William Aaron. A demonstration will be given by Warren Schmuck.

Lois Wanner
News Reporter

Golden Guernsey Meeting

The Lancaster County Golden Guernsey 4-H Club met Tuesday, May 14 in the Agriculture Room at Lampeter-Strasburg High School. Roll call was answered by stating your favorite food. A very short meeting followed with Betty Jo Bitler telling of preparations for the 4-H banquet with the Guernsey Club is in charge of.

It was also reported by Ricky Crider that the Ayrshire, Brown Swiss and Jersey 4-H club has set the date of the 4-H joint meeting for August 12 at Muddy Run Park. Their club also selected "Cartoon Characters" as the theme for the calf-dressing contest at the 4-H Roundup in July.

The meeting was adjourned and an auction was held for items donated by club members and parents to raise money for the club. There were items from silk stockings to small shrubs, to a cake with a Guernsey cow icing on the top, which was donated by Mrs. Alan Bair.

The next meeting is to be held at the home of Arthur Brenneman with a showing and fitting demonstration as the activity. It will be on June 11 at 7:30 p.m.

Diane Crider,
News Reporter.

DEAR INDEPENDENT FEED DEALER AND FARMER:

Unfortunately this letter comes too late for many of you. You have already been swallowed up by "bigness" in agriculture. You are the many farmers that have given into the theory that the only ones who can run your operations are big corporations. You are supplying equipment, buildings and labor for far less money than these so-called "saviors" of the independent farmer could do on their own. Already 20 percent of the laying flocks in Pennsylvania are under contract. Practically all broiler flocks throughout the United States are under contract. Let's not allow our dairy cattle, steers, remaining laying flocks and our independent feed dealers to end up in the same position.

Some of the very same companies that preached independence to farmers a few years ago are now completely integrated in most of their operations.

This letter is addressed to the many independent farm operators and feed dealers that still thrive in Pennsylvania. We, with Beacon, still champion the cause of the independent feed dealer and farmer. No large company can give the service and individualized attention that a local feed company can give.

American agriculture was founded on the basis of independent businessmen competing in a free market. This seems to be no longer possible in some cases

We, with Beacon, believe that both independent feed dealers and farmers can survive if they but give themselves the opportunity to do so Ask the independent potato grower how he has done this past year. We, with Beacon, are a privately owned feed company of independent agri businessmen such as yourself. We offer you quality products at competitive prices. We can give you decisions at the local level without a lot of the "red tape" philosophy.

The time has long since passed to sorrow over the disappearance of many independent farmers and feed dealers. The time is "now" when we ask you to support us, an independent, non-integrated feed company, operating throughout many counties in Pennsylvania. Why not call now and see what **Beacon** can do for your business?

Yours for an Independent Agriculture,

James A. Price

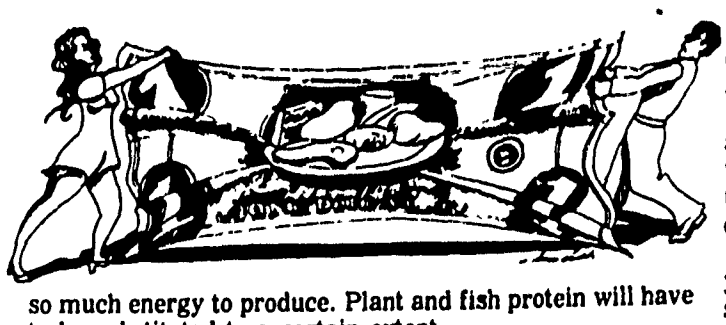
Elcoettes 4-H club meeting, home of Helen Ginder.

9 a.m-12:00 Noon – York County 4-H Tractor Driving Contest, 4-H Center.

ORGANIC LIVING

By

Robert Rodale



A FOOD SHORTAGE IS AROUND THE CORNER

For years, people in underdeveloped countries such as China, India and even Russia, have been waiting in line to buy food. In Peking last year, I saw lines forming at meat markets well before dawn on some mornings. Lines to buy bread have long been a feature of life in Russia and other countries.

Few people have thought that America, the rich bread basket of the world, would ever face similar food shortage problems. Our food problem has always been the opposite – how to get rid of surpluses without wrecking our farm economy.

Don't be surprised, though, if lining up at food stores becomes a feature of your life sometime soon. There is not one, but four reasons why we appear to be marching fast toward the end of the food surplus era. Here they are:

1. Changing climate. The world is getting colder. In fact, the past 50 or so years have been unusually warm, one reason for our crop surpluses. Now climatic trends are just moving us back to the shorter growing seasons that have been normal around the world for thousands of years.

The average growing season in England has already changed drastically. Farmers there have two weeks less to grow food each season than they did 25 years ago. Fewer monsoon rains in Asia are pushing millions of people there toward starvation.

2. Population growth continues. Even with effective birth control methods and small families by choice, our numbers keep increasing. And the whole world has 70 million more mouths to feed each year, calling for the production of more acres just to keep food supplies even.

3. Fertilizer supplies are down, because of the oil shortage. The much-heralded Green Revolution isn't working as well as expected, because farmers in poor countries can't get enough fertilizer, and for other reasons.

The Green Revolution concentrates on just a few crop varieties, making agriculture more susceptible both to disease plagues and climate changes.

4. U.S. food goes around the world. American economic strategy calls for exchanging our farm products for oil and other needed imports. Food exports are crucial to the health of our international trade. That could be the most important of all reasons why shortages will soon show up here.

Rising inflation is forcing people to spend a greater portion of their incomes on food. We've seen that when gasoline prices go up, people tend to cut consumption, by eliminating much non-essential driving. But rising food prices won't have a similar effect because people still have to eat, no matter what. After cutting back on between-meals snacking and plain overeating, you're just about down to rock.

For some urban poor, the breaking point has already been reached. A 96 percent rise in the price of rice in nine months has particularly hurt some low-income neighborhoods in New York and other cities, where rice is a staple "survival food."

But the middle class will feel the pinch as well. Many people have already cut down on meat and dairy products. They are expensive sources of protein because they require so much energy to produce. Plant and fish protein will have to be substituted to a certain extent.

"A typical American portion of steak would serve a family, not only in Asia but also in most of Europe, where it would be accompanied by diluent foods (potatoes, rice), which are served in America but commonly left uneaten," says biologist and gerontologist Dr. Alexander Comfort. "It seems fairly clear that by the year 2000 or sooner, beef will be eaten throughout the developed world rather in the way that pheasant or venison is now – as an occasional luxury."

Consumers are trying to shop more carefully, making every dollar count. You can get more food for your money by avoiding highly-processed products and sticking to whole, natural foods instead.

Consider potatoes, for example, Fresh, whole potatoes as they come from the earth are a bargain. But once you start purchasing "convenience" in the form of instant mashed potatoes, dehydrated potato soup, etc., the per-pound cost really escalates. You end up with more chemical additives, salt and calories, and fewer of the original potato's nutrients -- at more than four times the price!

Home gardening as a money-saving activity is going to become increasingly popular. We may even witness the beginning of the kind of widespread, intensive gardening long practiced in China. Amendments to the federal food stamp law now make it possible for low-income people to purchase garden seeds and plants with their stamps.

Dwindling open space will become more valuable because of its food-growing potential. New housing developments and shopping centers will be forced to stop gobbling up farmland.

What we can't grow, we'll manufacture in the form of synthetically fabricated foods. You should be extremely wary of this trend because many of the new "test tube foods" usually don't contain all the vital minerals, vitamins and other nutrients of the real foods they are designed to replace.

Concentrated food sources like wheat germ oil, brewer's yeast and fish liver soils will become more popular as people seek to compensate for possible diet inadequacies. Vitamin and mineral supplements will make more sense than ever as a form of dietary insurance.

The shortages are coming, and we'll all have to adjust. "Basically, the United States has moved almost overnight from a condition of large surpluses to a condition of relative scarcity," says Dr. Russell E. Larson, former dean of Penn State's College of Agriculture. "We have all seen what the sale of grain to a nation in short supply can do, at least temporarily, to our own economy and to our style of life."

xxx

If you have a house and grounds, you can raise some of your own food. "How to Live on Less and Love It More" is a 50-page booklet that will tell you how to get started on the road to independence. You can get a copy by sending fifty cents to Robert Rodale, Organic Living, in care of this newspaper. Please ask for the booklet by name and allow three or four weeks for delivery.

Hog Cholera In Puerto Rico

The U.S. Department of Agriculture reported that hog cholera has been confirmed in a Puerto Rican swine herd. The outbreak comes about 40 days after Puerto Rico earned "hog cholera free" status by going 12 months without infection.

Veterinarians with USDA's Animal and Plant Health Inspection Service (APHIS) have been dispatched to Puerto Rico to investigate. The herd of about 50 hogs is located near Barranquitas in central Puerto Rico. Infected and exposed animals will be destroyed and the area placed under quarantine to help prevent possible spread of the disease. The owner will be indemnified for his losses.

Hog cholera is a viral disease affecting swine only. It does not affect humans. Until a cooperative state-federal eradication program was begun in late 1962, the disease caused serious economic hardships for many U.S. swine producers.

The Puerto Rican case was confirmed May 4 from tissue samples submitted to the diagnostic laboratory at the National Animal Disease Center in Ames, Iowa. The last previous hog cholera case in this country was confirmed Feb. 7 in Mississippi. The Mississippi case was quickly confined and no disease spread occurred, APHIS officials said.

APHIS veterinarians urge all swine producers to remain alert for signs of hog cholera. Chronic forms of the disease may still threaten U.S. hogs.

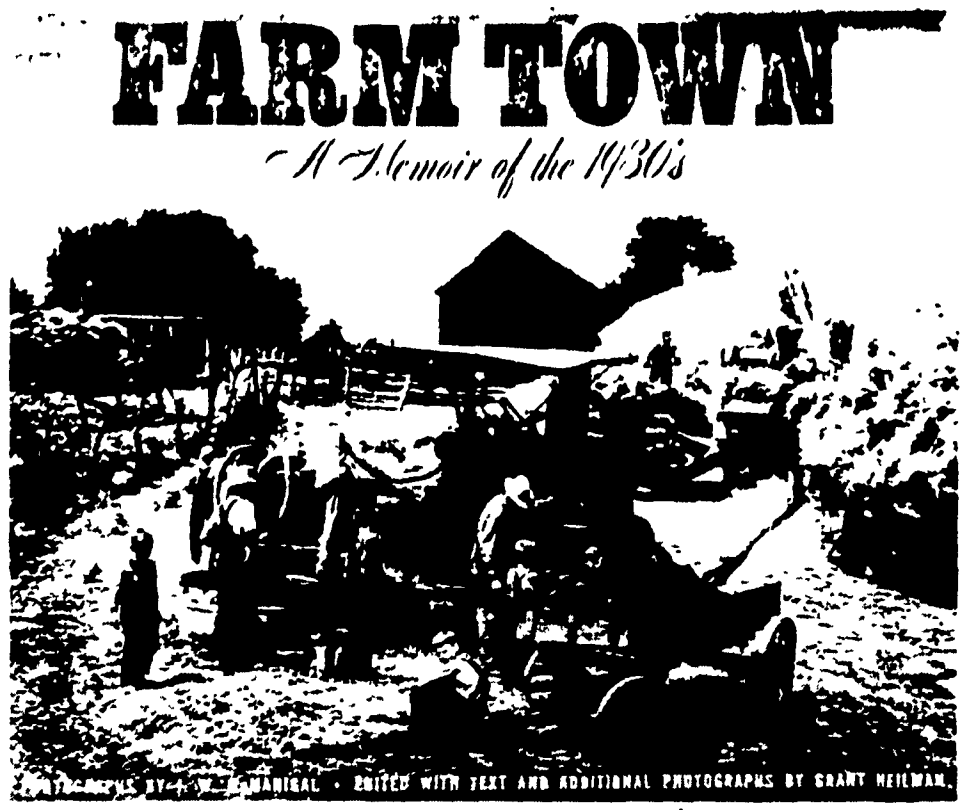
Heilman Book Depicts Farm Life in the 30's

Once at George's farm sale the auctioneer said to him: "That's a good old engine we're selling, isn't it, George?" George just couldn't tell a lie. "Thing's not worth a damn," he said. (From "Farm Town - A Memoir of the 1930's, edited by Grant Heilman)..

Many farmers throughout the Midwest were forced to sell off their land and equipment during the Depression to pay taxes and bills. Even though these auctions were signals of disappointment and defeat, you still found farmers who couldn't tell a lie if it meant saddling a neighbor with a bad tractor. That strength of character - and the plain living which fostered it - are the subjects of "Farm Town", edited by Grant Heilman, Lititz, one of the country's best-known agricultural photographers.

Most of the photographs in the book were taken by J. W. McManigal, a life-long resident of Horton, Kansas. One day McManigal simply walked away from his job as a newspaperman to become a professional photographer. Between the years of 1934 and 1940, McManigal packed his 4x5 Speed Graphic everywhere around Horton to record his friends and neighbors as they put up hay, threshed wheat, picked corn, went to the fair, and as they rested from their labors.

When Horton retired in 1963, he sold his negatives to his friend and fellow photographer, Grant Heilman. Heilman saw the possibility of a book depicting a unique era in American agriculture. In addition to McManigal's photos, there are a few by Heilman of contemporary Horton, taken to show what's happened to the town.



FARM TOWN
A Memoir of the 1930's
PHOTOGRAPHS BY J. W. McMANIGAL · EDITED WITH TEXT AND ADDITIONAL PHOTOGRAPHS BY GRANT HEILMAN.

The book is laced with the often salty comments of Horton residents who knew McManigal and the times he depicted. "Farm Town" is published by the Stephen Greene Press, Brattleboro, Vt. It's on sale at the Lititz Book Store, Provident Book Stores and Barr-Hurst, at $7.95 for the soft cover and $12.95 for the hard cover edition.

Candidates Sought for Dairy Princess Crown

Dairy Month will soon be here and the Dairy Princess committee is looking for qualified contestants to represent Lancaster County's largest argiculture industry as the 1974 Dairy Princess.

All contestants will receive valuable prizes. The winner will have the opportunity to represent the dairy industry at fairs, banquets and community organizations throughout the coming year. She will also represent Lancaster County in the Pennsylvania Dairy Princess contest in September in Harrisburg.

The new Dairy Princess will participate in a seminar in personal improvement and grooming along with other county winners, and there are prizes for all state contestants plus a cash award for the winner.

Contestants wishing to enter must meet the following requirements:

1. Live in Pennsylvania.
2. Be a daughter of a dairy farmer, a dairy farm manager, herdsman, or dairy farm owner during the current year, or the contestant must own more than one dairy animal prior to May 1, 1974.
3. Have completed her junior year of high school and will not reach her 21st birthday by September 1 of the year of the contest.
4. She must be single and never married.
5. Have parent's or guardian's consent.
6. Former local winners are not eligible.

Raelene Harbold, outgoing Dairy Princess, will crown her successor at a dinner on June 29 at the Farm and Home Center.

Entry blanks can be obtained from Mrs. Robert Gregory, RD1, Box 122, Lititz, PA 17543, or from the county Agricultural Extension office. A picture must be included and deadline for entries is May 30, 1974.

(Continued from Page 1)

economics or agriculture.

The board approved the 10 scholarships following interviews before the scholarship committee. Winning the scholarships were six girls and four boys. According to Max M. Smith, committee chairman, there were 20 applicants for the 10 scholarships.

Winners were chosen on the basis of financial need, scholastic achievement and leadership ability. All have met scholastic and entrance requirements at their chosen colleges or universities.

Of the 10 recipients, five are planning on attending The Pennsylvania State University; three plan on attending Mansfield State College, one is headed for Messiah College, Grantham, Pa.; one for the University of Delaware, Dover; and one is planning on attending Delaware Valley College of Science and Agriculture, Doylestown.

An irrevocable trust fund established by the late Elmer L. Esbenshade, one of the founders of the Farm and Home Foundation, makes most of the scholarship funds available. The remainder are financed directly by the Foundation.

Those awarded scholarships are:

David W. Bitler, son of Mr. and Mrs. Ralph D. Bitler, Peach Bottom RD2. He is a 1973 graduate of Solanco High School and plans to major in ag business at Penn State.

David was a member of the second place Eastern National FFA dairy judging team and is currently president of the Pennsylvania Junior Guernsey Breeders Association. He is currently self-employed as a relief milker in southern Lancaster County.

Kris Halls, daughter of Mr. and Mrs. Lawrence M. Halls, 567 E. Jackson St., New Holland. She is a 1973 graduate of Garden Spot High School and plans to major in home economics at Mansfield State College.

Kris was unable to attend Tuesday night's interview as she is presently studying in Denmark with the American Field Service.

Richard D. Hess, son of Mr. and Mrs. Richard H. Hess, Strasburg RD1. A June graduate of Lampeter-Strasburg High School, he plans on majoring in dairy science at Penn State.

Rick is president of his FFA chapter and past Lancaster County FFA president. He also served as vice president of the 4-H Dairy Club and Baby Beef Club and is secretary of the Fellowship of Christian Athletes.

Rick was a member of the Livestock Judging team and played football, basketball and baseball for Lampeter-Strasburg High School.

Wendy Sue Linkous, daughter of Mr. and Mrs. William D. Linkous, 1100 Chestnut St., Columbia. She will graduate in June from Columbia High School and plans to major in home economics education at Mansfield State College.

Wendy is a member of the National Honor Society, Student Council, senior senate and assistant editor of the Press Club. She is also the school's drum majorette and plays the flute and piccolo.

She said she enjoys cooking, sports and working with children, in addition to belonging to youth fellowship at Salome United Methodist Church.

Heidi J. Linn, daughter of Mr. and Mrs. Bernard C. Linn, 195 Stanley Ave., Landisville. She is graduating from Hempfield High School and plans to major in ag-journalism at Penn State University.

Heidi was in the Junior Miss Pageant and belongs to the Photography Club. Her interests include photography, singing, writing and her church youth group.

Joanne Louise Rutt, daughter of Mr. and Mrs. Norman Rutt, Elizabethtown RD1. She is graduating in June from Elizabethtown Area High School and will major in home economics at Messiah College.

Joanne is a varsity cheerleader, member of the yearbook staff, senior class secretary and a member of the Governors Youth Safety Council.

Joanne said her main interest is sewing and also won first place in the Elizabeth Hughes Society sewing contest.

Kristine Stehman, daughter of Mr. and Mrs. J. Richard Stehman, Conestoga RD2. She will graduate from Penn Manor High School and plans to major in home economics at the University of Delaware.

Kristine is president of Future Homemakers of America and vice president of Girls' Service Organization. She is also a member of the American Field Service, the 4-H Sewing Club, 4-H Cooking Club and the National Honor Society.

Thomas R. Stottlemyer, son of Mr. and Mrs. A. Robert Stottlemyer, Paradise RD1. He is graduating from Solanco High School and will major in agriculture engineering at Penn State's Schuylkill Campus.

Tom is corresponding secretary for the Lancaster County FFA chapter and is president of Explorer Post 89. He is also a member of the National Honor Society.

Dennis P. Werner, son of Mr. and Mrs. Paul Werner, Mount Joy RD2. He is graduating from Donegal High School and plans to major in agronomy at Delaware Valley College of Science and Agriculture.

Dennis is a member of Pennsylvania Power and Light's Explorer Club. His high school activities include football, wrestling, track, band, stage band and the chess club. His main interests, he said, are in sports and agriculture-related fields.

Anne Louise Williams, daughter of Dr. and Mrs. Louis E. Williams, 101 E. Conestoga St., New Holland. She is graduating from Garden Spot High School and plans to major in home economics at Penn State.

Captain of her school cheerleading team, Anne is also a member of the Garden Spot Performing Arts, student council, chorus, Garden Spot 4-H Sewing Club and 4-H County Council.

Anne was also the FFA sweetheart and winner of the Women's Creative Day contest. In the sewing club, she was county and district winner.

Members, in addition to Smith, of the scholarship committee of the Farm and Home Foundation are Roy Brubaker, Lititz; Robert F. Eshleman, Mount Joy RD2; Robert Herr, Narvon RD2; and Jay Landis, Lancaster RD6.

Debra Gregory of Lititz, left, was named the Penn State Dairy Princess during the 49th annual Dairy Exposition held recently at University Park. Miss Gregory is a sophomore majoring in home economics education. Runner-up was Kathryn Potter, right, of Kingsley, sophomore in mineral economics. Daughters of active farmers, Miss Gregory and Miss Potter were chosen for appearance, service to agriculture, speaking ability, personality and poise, and dairy industry knowledge.

Gregory Girl Named PSU Dairy Princess

Penn State's new Dairy Princess is Debra Gregory, Lititz, daughter of Mr. and Mrs. Robert Gregory. The Lancaster County lass topped a field of four finalists during the dairy princess competition held during the recent 49th annual Dairy Exposition.

Debra is enrolled in the College of Human Development, majoring in Home Economics Education. She would like to work for the Cooperative Extension Service or teach high school when she graduates. Her college activities include: Dairy Science Club, Dairy Exposition, 4-H Rec Team, and American Home Economics Association.

The contestants were judged on appearance, service to agriculture, speaking ability, personality and poise, and dairy industry knowledge. To enter the contest, each girl had to be a daughter of a dairy farmer currently producing milk, and a student in good standing at Penn State.

The First runner up was Kathryn Potter from Kingsley. Her parents are Mr. and Mrs. Lloyd C. Potter. Kathy is majoring in mineral economics at Penn State. She would like to attend graduate school or law school when she graduates. Her college activities include Campus 4-H club.

Judges were Mrs. Donna Eckly, secretary for the dairy science department; Mrs. Sally Kemp, member of the home economics department; and Dr. Paul Shellenberger, a member of the dairy science faculty. The contest is held annually as a part of the Dairy Exposition at Penn State.

Beth Ann Eckly, daughter of Mrs. Donna Eckly of Milesburg, was chosen as the Dairy Science Club's sweetheart. Beth will represent the club along with Debra Gregory at various activities during the year.

Debra will represent the club at the Ms. College of Agriculture contest and in the Pennsylvania State Dairy Princess Contest, both in the fall.

Mrs. Jeanette Steffy . . .

"Kitchen Aires" - Active Lititz Senior Citizens

The month of May is observed as Senior Citizens Month. Today as never before groups of senior citizens are banding together and enjoying life in various ways.

One of the largest organized groups of senior citizens is one in Lititz, Lancaster County. They have 297 members, mostly from Lititz and a few from surrounding areas such as Manheim, Rothsville, Schaefferstown and Lancaster. George Royer is president and Christ Koehler is treasurer. Both are from Lititz. Mrs. Mabel Mumma, Rothsville, is secretary. They meet the third Thursday of each month at :30 P.M. at the Lititz Recreation Center. They always have ood programs and refreshments at their meetings. They ay one dollar dues and take a collection to cover social xpenses such as entertainment and refreshments. They also ay three dollars a year to the Lititz Recreation Center.

They have Activity Day the first Thursday of each month. They take their lunch and play bingo or cards. Some are on he bowling team. Some play miniature golf. This is a year ound sport. They play every Tuesday at Park City in inter and at The Dutch Lanes, Ephrata, in summer.

One of the outstanding groups within the Lititz Senior itizens which started as a fun thing now provides real entertainment for rest homes and homes for the aged, retarded roups, Farm Women meetings, Mother & Daughter anquets, Eastern Star meetings, church meetings and anquets and conventions. We're speaking of a kitchen band nown as "Kitchen Aires" which is composed of twenty-two omen. This band started April 1970. It is directed by Mrs. eanette Steffy of Lititz who has been a member of the Senior itizens for 12 years. Mrs. Lester Ruth, Lititz, is assistant irector and Mrs. Helen Walton, near Willow Street, is ianist. At first they went to nearby places in Lancaster and ebanon Counties but now they go as far as Philadelphia, the oconos and all over York, Lebanon, Lancaster and Berks ounties. They usually go by auto. They have two Georges hom they call mascots who drive them and about three omen drivers. On long trips they hire a bus. Last November he Pennsylvania Farm & Power Equipment and Dealers ssociation furnished a bus, meals and lodging at the Buck ills Falls Inn in the Poconos where they performed for their onvention.

This group goes anywhere they are asked to go. They do not ake a charge but accept pay except when they perform or homes. They have performed for Conestoga View, hite Hall, Maple Farms at Akron, Lancaster County and yomissing in Berks County, The Lutheran Home For The ged in Philadelphia and Eastern Star Home in hiladelphia. The month of May is one of their busiest onths because they perform for many mother and daughter anquets. They performed for three last week and for the eola United Methodist Church this past Wednesday vening. That was their 190th performance. They not only ulfilled these engagements but had to turn away about nine nother and daughter banquets this month. December is also very busy month for them. To get an idea of their opularity, they have engagements booked already for ecember and one booking for 1975.

These ladies put on quite a show. Their performances last bout three quarters of an hour. Each lady dons a long calico r checked dress and wears a cute little lace trimmed rimless hat. Their musical instruments are most original reations and Mrs. Steffy directs the band with her heavy ooden spoon. Three ladies strum washboards, one uses arge lids for cymbals, a couple wield wooden hamburger resses and mallets that do a tremendous job for the "tick ock" on Grandfather's Clock. Potato mashers with bells on ake merry some of their numbers such as The Bells of Saint ary's. Two use teakettles with peas or rice in them to shake o give a rumba effect The clever drummer makes rhythm n her heavy plastic covered cheese box using spatulas for ticks Cleverly designed bleach bottles with kazoos on the nd add melodious volume.

Mrs Katie Ditzler gives monologues and tells stories. The and plays old favorites like Ta-Ra-Ra Boom-Der-E, Anhors Aweigh, Margie, Yankee Doodle, I'm Looking Over A our Leaf Clover, The Pennsylvania Polka, April Showers, aiting For The Robert E. Lee, The Stars And Stripes orever and When The Saints Go Marching In. For Mother & aughter banquets they're sure to sing one verse and play ne of M-O-T-H-E-R and every program concludes with the udience joining in singing "How Great Thou Art."

Pictured above are the Kitchen Aires, members of the Lititz Senior Citizens Club. They are all dressed in the calico dresses they wear for performances, and are playing their homemade "kitchen" instruments.

by Mrs. Charles McSparran Farm Feature Writer

How old are these ladies? There are three in their sixties, two in their eighties and the rest are in their seventies, mostly past seventy-five.

Several of these ladies are very busy, particularly the ones who also belong to the Senior Citizens chorus, because in addition to their performances they have regular rehearsals. The Kitchen Aires practice every first Thursday of the month from 9 to 10:15 p.m. and the chorus practices from 10:15 to 11:15 p.m. This is a pretty big day when you consider it comes on the heels of their Activity Day.

The chorus also has men in it. There are 30 to 35 members in the chorus. This group sings mostly in homes in Lancaster and Lebanon Counties.

Mrs. Steffy is one of the very active ones in the Lititz Senior Citizens. In addition to directing the band she has sung soprano in the chorus for about two years. Having a musical background she enjoyed playing her piano before arthritis crippled her fingers. She also plays miniature golf every Tuesday.

Jeanette was born in Lancaster City but married a farmer, Harry Steffy. They started farming on his father's farm on Witmer Road. They farmed there for six years then bought a farm between Lititz and Manheim. They farmed that 108 acre place for 34 years. They raised a lot of beef cattle and pigs and kept a few chickens. They raised tobacco and Mrs. Steffy helped plant it. They had a nice garden which kept Mrs. Steffy busy freezing and canning. She also dried corn, beans and apples and made jams and jellies. She still loves flowers and raises a few tomatoes.

The Steffys were blessed with two sons and one daughter. Roy K. just moved to Kittanning, in western Pennsylvania. Donald K. is married and lives at Lititz RD2. Lois is married to Henry Eshleman and lives on a farm on Lititz RD4. They have a pitch and putt golf course.

Mrs. Steffy was a member of Saint Stephen's Lutheran Church in Lancaster until 1961 and since then has belonged to the Saint Paul's Evangelical Lutheran Church, Lititz, where she is a member of the Sunbeam Sunday School class. She formerly sang in the church choir. Her hobbies have always been music and flowers.

Mrs. Steffy recommends these two recipes of hers:

Mother's Spice Cake

1 cup granulated sugar
½ cup lard
2 eggs
1 cup molasses
3 cups flour
1 teaspoon soda
1 teaspoon cinnamon
1 teaspoon cloves
1 teaspoon nutmeg
1 cup buttermilk

Bake in a 13 x 9 pan in a 350 degree oven.

Green Tomato Pie

5 green tomatoes, sliced very thin
1 cup granulated sugar
1 tablespoon vinegar
a small piece of butter
a little cinnamon
2 tablespoons molasses

Slice the tomatoes into an unbaked pie shell. Add balance of ingredients. Cover with top crust. Bake in 400 degree oven for about 20 minutes, then reduce heat to 350 degrees until pie is baked and tomatoes are tender.

Home On The Range

Some very interesting and unusual recipes have passed across this desk recently. We've included some of them this week and hope you'll enjoy experimenting.

We still need dairy-related recipes for June Dairy Month. Does anyone have a few they'd like to contribute? Send them to "Recipes", Lancaster Farming, P.O. Box 266, Lititz, Pa. 17543

xxx

Spaghetti and Meat

1½ pounds ground beef
1 medium onion
1 small pepper
8 ounce can tomatoes
6 or 8 drops hot pepper sauce
2 teaspoons worcestershire sauce
mushrooms and ripe olives (optional)
6 or 8 ounces spaghetti

Brown meat, onion and pepper in frying pan. Then put into large saucepan. Add tomato sauce, tomatoes, hot pepper sauce, worcestershire sauce and mushrooms and olives. Add 1½ to 2 cups water.

Bring to boiling and add spaghetti (uncooked) to mixture. Cook 40 minutes covered and 10 to 15 minutes uncovered. Stir occasionaly. Serves 10 to 12. Easy and delicious.

Hannah Stoltzfus
RD1, Leola.

Cheesy Spaghetti Omelet

3 egg yolks
3 egg whites
¼ teaspoon salt
⅛ teaspoon pepper
1 lb. can spaghetti in tomato cheese sauce (or use your own spaghetti leftovers)
2 tablespoons butter or margarine
½ cup grated cheese (any kind)

Mix yolks, salt and pepper with spagetti. Beat egg whites stiff. Fold into spaghetti mixture. Heat oven to 375 degrees.

Melt butter in skillet. Pour in spaghetti mixture. Cook over medium heat until spaghetti is a little brown at edges. Sprinkle with grated cheese.

Then bake about 10 minutes until cheese melts. Cut in wedges to serve.

Harriet Greenawalt
Lancaster, Pa.

xxx

Delicious Shoo-Fly Cake

6 cups flour
3 cups brown sugar
1 cup lard
1 teaspoon soda

Mix as for pie dough.

1 cup molasses
1 teaspoon soda
2 cups hot water

Stir.

Set 3 cups crumbs aside. Add the remaining to the liquid. Pour into 2 9-inch square pans (greased). Top with the 3 cups remaining crumbs. Sprinkle lightly with cinnamon. Bake at 350 degrees for 50 to 60 minutes.

Mary Beiler
RD1, Christiana.

xxx

Raspberry Whip

1 package raspberry jello
1 cup boiling water
1 cup raspberry juice
¾ cup sugar
3 egg whites, beaten
½ cup whipping cream or non-fat dry milk

Dissolve jello in the boiling water. Then add raspberry juice and sugar. Chill until slightly thickened. Then beat egg whites till stiff. Whip cream and fold all together.

Mrs. Ervin M. Sensenig
RD2, East Earl.

xxx

Economy Soup

1 pint beef broth and any leftover beef (chopped)
2 quarts water
1 beef boullion cube

Bring to a rapid boil then add:

1 teaspoon salt
1 large carrot (chopped)
2 large onions (chopped)
1 quart diced potatoes

Sprinkle 2 tablespoons macaroni and 2 tablespoons rice over top. Water should cover. If not, add a little more. Cover tightly and simmer for 20-25 minutes. Add 1 pint cream or milk and a little butter and serve with crackers or toast.

Mrs. Ervin Zimmerman
Ephrata, RD3

xxx

Raisin Diet Cookies

Boil together for 3 minutes:

2 cups raisins
2 teaspoons cinnamon
½ teaspoon nutmeg
1-3 cup butter or shortening
1¼ cups water

Set aside to cool.

Add:

2 eggs
2 cups sifted flour
½ teaspoon salt
1 teaspoon soda
1 teaspoon baking powder
2 teaspoon liquid sweetener

Bake at 350 degrees for 12 to 15 minutes. Makes 24 cookies.

Mrs. J. Adam Stumpf
RD3, Elizabethtown.

Union Pie

3½ cups fresh buttermilk
1 cup sugar
1 cup molasses
¾ cup flour
2 eggs
1 teaspoon soda

Mix all together, buttermilk, sugar, and molasses, and flour. Then add beaten eggs and soda. Beat all together until the dough is smooth. Bake at 350 degrees till golden brown, or until custard-like.

Mrs. Daniel Z. Weaver
New Holland RD1

xxx

Tomato Soup Cake

½ cup shortening
1 cup sugar
1 can tomato soup
1 teaspoon baking soda
2 cups flour
2 teaspoons baking powder
¼ teaspoons salt
1 teaspoon cinnamon
1 teaspoon cloves
1 teaspoon nutmeg
¾ cup evaporated milk

Bake at 350 degrees for 30-40 minutes.

Mrs. Dawn Gilbert
RD1, Columbia.

xxx

Strawberry Long Short

Sprinkle ½ cup sugar over 3 to 4 cups sliced fresh strawberries. Let set.

2 cups sifted flour
6 tablespoons sugar
1-3 cup shortening
¾ teaspoons salt
4 teaspoons baking powder.

Mix. Combine 1 large beaten egg, 2-3 cup milk. Stir into flour mixture.

Pour into greased pan. Spread the sweetened berries and juice over top.

Cream together ¼ cup soft butter, ¼ cup sugar, 3 tablespoons flour, and put on top. Very good served hot with sweetened milk.

Lena Stoltzfus
New Providence, Pa..

xxx

Uncooked Candy

1 cup peanut butter
1 cup honey
2 cups powdered milk
¼ cup wheat germ.

You may add cocoanut or raisins. Mix well together and roll into small balls.

Mrs. Harry Bear
Lancaster, Pa.

xxx

"Peachie Cinnamon Whirligigs"

1 can (29 ounce) sliced peaches
2 tablespoons cornstarch
pinch of salt
1 1-3 cup Bisquick
2 tablespoons sugar
2 tablespoons butter or margarine, melted
1-3 cup milk
2 tablespoons butter or margarine, softened
¼ cup sugar
1 teaspoon cinnamon

Preheat oven to 425 degrees.

Combine peaches, with syrup, and cornstarch in saucepan. Cook, stirring constantly over medium heat until mixture thickens and boils. Boil and stir one minute. Keep hot, stirring occasionally.

Stir Bisquick, sugar and melted butter and milk to a soft dough. Gently smooth dough into ball on well-floured board. Knead 8 to 10 times. Roll dough into 9 inch square, spread with soft margarine.

Mix ¼ cup sugar and cinnamon. Sprinkle over square. Roll up, seal well by pinching edge of dough into roll. Pour peach sauce into 8x8x2 sqaure pan.

Cut roll into 1 inch slices. Place cut side up on peach mixture. Bake 20-25 minutes. Serve warm with milk if you like.

Mrs. Naomi K. Blank
Gap, Pa.

xxx

Pineapple Rhubarb Jelly

4 cups rhubarb
4 cups sugar
1 small can pineapple

Boil 15 minutes. Keep stirring. Add 1 package red jello. Boil 5 minutes.

Ella Mae Zimmerman
RD3, Ephrata.

Project HOPE, which began with a single hospital ship in 1958, now operates Schools of Health Sciences and other medical programs in several countries around the world.

How To Clean Rings

The buildup of soil on diamonds and most other rings is from the grease and dirt from your hands. Ammonia or soap and water will get rid of it, says Mrs. Ruth Ann Wilson, Extension clothing specialist at The Pennsylvania State University. To clean around prongs and indentations, you can use an old, soft toothbrush. For cleaning silver jewelry, Mrs. Wilson suggests you use a silver cleaner. But avoid the kind where you dip your jewelry into the liquid. Clean your rings instead or with an old toothbrush. Hand rubbing will help keep them shiny.

LADIES HAVE YOU HEARD?

By Doris Thomas, Extension Home Economist

How To Use Laundry Equipment to Save Energy

Even though the energy required to run household appliances represents only about 5 percent of all the energy used in this country, you can help reduce this amount by using your appliances efficiently, and only when necessary.

Automatic laundry equipment rates high on the list of indispensable appliances. Try the following often-overlooked suggestions for making more efficient use of these appliances, and at the same time conserving energy and water.

Most automatic washers have water level and temperature controls which can conserve energy and water when used properly. The water level should correspond to the size and type of load. Too much water can be wasteful. Not using enough water with a large load may result in the need for a re-wash.

Recommendations of the appliance maker and garment manufacturer should serve as guides in selecting the correct water temperature. But you can bend some of these general rules to conserve energy. For example, you can use warm water to wash white clothes if you pretreat soiled areas, such as collars and cuffs with detergent before putting the garments into the washer.

If a load of laundry is only lightly soiled, it is not necessary to use the full wash cycle. Or, if your machine has a suds-saver feature take advantage of this opportunity to re-use the hot water and detergent from the first wash load. There is no reason why the sudsy water used to wash a load of white or lightly-soiled laundry can't be used again to wash colored items, or dark jeans and socks. If you are looking for a new washer, consider the suds-saver feature since it conserves water, detergent and energy.

There are several ways to cut down on the energy usuage of clothes dryers. Overdrying wastes energy and is hard on fabrics. Remove clothes from the dryer when they still have a little moisture in them, which is a natural state. If you have a time-controlled dryer, check frequently toward the end of the cycle to determine the correct time to remove clothes. The ideal dryer is one that turns itself off automatically when the clothes are just right.

Check the dryer venting regularly to be sure it is clean and there are no obstructions. It is especially important to keep the lint filter clean to permit free circulation of air.

There are many times when you don't have to use a dryer, especially in warm weather. Line drying is satisfactory for almost all types of laundry, except perhaps towels and other items which need the fluff-drying provided by an automatic dryer.

'Tis The Season To Make Coleslaw

Through a combination of circumstances, the coleslaw season is upon us. First, it's spring and a time to think of easy-to-fix, warm weather menus. Second, the word from the U.S. Department of Agriculture is that fresh cabbage is in larger-than-usual supply because of heavy yields from Florida, South Georgia, Louisiana, and South Texas.

With an abundance of cabbage available east of the Rocky Mountains in April, coleslaw is a "natural" for the homemaker.

There are undoubtedly many recipes for coleslaw. Here's one that is especially tasty and provides six servings:

3 cups coarsely shredded cabbage
1½ teaspoons salt
½ teaspoon dry mustard
White pepper, as desired
¼ cup sugar
2 tablespoons lemon juice
1 tablespoon tarragon vinegar
¼ cup table cream
¼ cup finely chopped green pepper
1 tablespoon chopped pimiento
½ cup finely chopped celery
2 tablespoons finely chopped onion

Thoroughly mix all ingredients except vegetables. Then combine the vegetables and mix well. Finally, gently stir in dressing and chill the slaw before serving.

As an interesting variation of this recipe, additional field-fresh summer vegetables can be added as they come on the market.

Hints On Taking House Inventory

Having an inventory of your household and personal belongings is important in the event of loss through fire, flood, windstorm, tornado damage or theft. Such an inventory is not ironclad evidence, but it can help convince an insurance adjustor.

When making a claim, the burden of proof is on you, the homeowner. If you have no inventory, no receipts or no evidence of ownership, then the adjustor must rely on his own judgment. He sizes up a person by what he earns, the neighborhood he lives in, money in the bank and style of living. If you don't fit in the typical catagory, you could be in for a difficult time in having your losses replaced.

There are other advantages to having a household inventory, for example, an item by item inventory lets you know if you are adequately insured. Most people are not. If you suffer an uninsured loss, which is tax deductible, an inventory puts you in a better position to prove a loss. And an inventory makes you aware of items you should insure separately.

If you should suffer a loss, the adjustor will calculate the present value of an item by figuring what it would cost to replace it, including sales tax, with an identical brand new item. Then he allows for depreciation. A short cut for you is to note the date of purchase and the original cost. Other ways to simplify the process of making a household inventory:

- Use your camera to record what you own. Write prices and dates of purchase on back of the photos.
- Go through each room recording on a tape recorder what you see. Describe the items. Don't forget to put your tape recorder on your list, too.
- Make a note of the serial numbers on appliances and include brand names.
- Keep your inventory up to date by adding major purchases to you list.
- Keep lists, photos, and tapes somewhere other than at home. One good place is you safe deposit box.

Meat Buying Tips for a Small Family

Buying meat that's economical is a special concern for small families. But according to Mrs. Ruth Buck, Extension foods and nutrition specialist at The Pennsylvania State University, even small families can use a beef raost to good advantage. Buy a smaller chuck or rump or round roast for a good pot roast to serve hot. Then plan to use the remainder for sandwiches, meat and vegetable pie, curried with rice or any of dozens of ways. Such a practice is a time and money saver plus offering good eating.

Care Of Acrylic Enamel Finishes

Major appliances usually are coated with an acrylic enamel finish which can be washed with warm water and detergent. But stay away from ammonia, alcohol, clorine bleach, abrasive cleaners or strong solvents. They can permanently damage these surfaces.

How To Thaw Bread

Leave the wrapper on frozen bread when thawing it. If the bread is unwrapped, moisture will collect on the surface of the loaf, making it soggy.

Farm Women Societies

Society 9

Mrs. Dorothy Bitts, Lancaster, presented an illustrated talk of her trip through Germany at the meeting of Farm Women Society 9 held in Colemanville United Methodist Church.

Members of Society 25 were guests at the covered dish luncheon. Devotions were presented by Mrs. Clyde Dunkle. Mrs. Paul Zercher, president, served as hostesses and each guest was personally introduced.

Members of Society 9 will be guests of Society 24 at 7:30 May 29 in the Leacock Church of the Brethren.

Society 9 entertained guests at Conestoga View on Thursday, May 16.

The next meeting will be held at the home of Mrs. Elmer Huber, Marticville on Thursday, June 13 at 12:30.

Society 10

Farm Women Society 10 recently celebrated their 50th Anniversary with a dinner meeting at the Washington House in Historic Strasburg.

There are two charter members of the original ten in the Society. They are Mrs. John Esbenshade and Mrs. Milton Landis.

Invited guests including Mrs. Carl Johnson, Mrs. Carl Diller, Mrs. Sterling Elmer, Mrs. Milton Funk and Mrs. Ellis W. Wolfe, who is one of the Charter members no longer in the Society.

Mrs. Esbenshade who is 93 and still attends the meetings gave some highlights of the organizational meeting. Miss Frances LeFevre reported on many interesting events taken from the minutes of the meeting held during the last 50 years.

As a response to the roll call, each member gave an outstanding incident related to Society 10.

Officers of the Society are Mrs. Jay Habecker, president; Mrs. Cyrus Neff, first vice president; Mrs. Morris Miller, second vice president; Mrs. Jacob Evans, secretary; Mrs. Abram Miller, assistant secretary; Ida Kunkle, corresponding secretary; Mrs. Frank Hodecker, treasurer.

The next meeting will be held on Saturday of Society 26 will be entertained.

Society 19

Society of Farm Women 19 held its meeting recently at Landisville Church of God 10:30 to 3:00 p.m. to sew cancer dressings directed by Mrs. David Yoder and Miss Irene Heisey. Ten dozen items were completed to be given to Visiting Nurses Association.

A covered dish luncheon was in charge of Mrs. Ross Weaver.

Next meeting will be held at the home of Mrs. Henry Lehman, Manheim RD1 June 8th at 1:30 p.m. at which time Jeanette Metzler will demonstrate the Art of Quilling.

Society 23

Society No. 23 held a Mother-Daughter meeting in the historic home of Mrs. Ralph Kauffman, Lancaster RD2. A dessert-smorgasboard was featured.

The program consisted of a fashion show of hand made garments modeled by the mothers, daughters and guests. Mrs. Andrew Nissley was the narrator. Crafts and arts made by the members were shown and explained by the president, Mrs. Glenn Burkholder. They consisted of bedspreads, quilts and others.

Devotions were led by Mrs. Howard Martin.

The theme song "Brighten the Corner Where You Are" was sung and accompanied on the violin and piano by Mrs. Clayton Charles, Miss Mary Ann Martin and Miss Connie Hoak.

Musical selections were also presented by Mrs. Peggy Flinchbaugh, Mrs. Mary Louise Armstrong and Mrs. David Funk.

A tour of the 106-year-old farm house was given by the hostess Mrs. Kauffman.

Prizes were given to the oldest grandmother, Mrs. John Thomas and the most colorful dress to Mrs. Peggy Flinchbaugh.

The next meeting will be held at the summer home of Mr. & Mrs. Charles Frey, Long Level on June 15 at 6:30 p.m. It will be a family picnic, covered dish style.

Ida Risser

The sugar peas are blooming this week as they busily climb up the fences we struggle to put up for them. I'm not concerned about picking the six long rows of peas as much as I'm concerned about the one long and wide row of strawberries. I'll probably wish I hadn't covered them so carefully with black plastic the one night that we had frost. Maybe the children will help more willingly if I increase the price per box, which I pay them for picking.

xxx

Years ago, I felt the clock on the kitchen wall was the master of my day. Six o'clock–feed the baby, seven o'clock"breakfast and get the children ready for school, eight o'clock–do the laundry, nine o'clock–bath the baby, ten o'clock–feed him again, 11 o'clock–take him up for a nap, 12 o'clock–cook dinner for my husband. And so a schedule was set for the whole day.

Now I feel the calendar on the kitchen wall runs may day. When I tore the April page off, there was May with all but three days filled. Some days there are four or five appointments written down. Having a daughter that graduates from high school this year adds to the hectic schedule. Another daughter is in two choirs and takes flute and paino lessons.

Several 4-H clubs are reactivated in the Spring and three children are in four clubs at the same time. Then there are school activities, dentist appointments, haircuts, picnics, and family parties. Spring housecleaning will have to be done in spurts as usual.

After all this running around, it seems the nicest part of the day is suppertime when the menfolk come in from the field or barn and we all sit down to a big meal and share the happenings of the day. Of course the apple pie is barely "down the hatch" when some of us scatter again for evening meetings.

A New Taste Treat

Want to add a new taste treat to that old family favorite, try creamed onions. Next time, mix in some finely chopped salted peanuts as you make the cream sauce. Sprinkle more of the chopped peanuts on top of the dish as you serve. Onions are abundant now–in contrast to the shortages of last spring.

Hot dogs may be known by other names such as weiner or frankfurter. And you may think they're all the same. But, according to Penn State Extension foods and nutrition specialists, not all hot dogs are the same in content, price or weight. They advise you to read package labels carefully.

Grange Sewing Boasts Record Entry List

Judging of a record 2,324 entries is underway in the 1974 Pennsylvania State Grange sewing contest, A. Wayne Readinger, State Grange Master, announced today.

The number of entries is almost double last year's total and far exceeds the state's goal of 1,500, according to Mrs. Ross Metz, of Allensville, state chairman of women's activities for the Grange.

Included among the entries, she said, are "at least four" from men.

Judging at the local and county level (at Subordinate and Pomona Granges) will be completed by May 20. The state competition will be held at the Grange Building in Harrisburg (1604 N. Second St.) Wednesday May 29, when first, second and third places in each of three age categories and a best-of-show will be selected.

The three top state entries then will be sent to New York for judging in the national Grange contest in June. Top prize in the national contest will be a trip for two to Bermuda. Prizes also will be awarded in the local, county and state competitions.

This year's record entry list came from 213 subordinate and 45 Pomona Granges, Mrs. Metz announced. Included were 1,607 entries from Grange members and 717 from others sponsored by Grange members.

Armstrong county produced the highest number of entries, 245. Berks county was second with 225 entries, followed by Somerset, 181; Clearfield, 167; Mercer, 160; Huntingdon, 120, and Perry 119. The seven counties accounted for 1,217 entries, eight more than the total received from the entire state last year, Mrs. Metz said.

Garments judged in the state contest will be on display at the Grange building Thursday, May 30, Mrs. Metz added.

How High Is Your Blood Pressure?

Governor Milton J. Shapp, in a proclamation designating the month of May as "High Blood Pressure Month" in Pennsylvania, has urged all citizens to have their blood pressure checked as a preventive measure.

The proclamation is part of a nationwide effort to increase awareness of high blood pressure and the dangers if undetected and untreated.

"Statistics suggest over one million Pennsylvanians have high blood pressure and half of them are unaware of it," the Governor said. "It is a 'silent' condition in its early stages, with no set symptoms. But undetected and untreated it can lead to heart attack, stroke, and kidney disease."

"The human and economic loss from disability and premature death is particularly regrettable when high blood pressure can be determined with relative ease and there are such excellent facilities in Pennsylvania for controlling this health problem."

The statewide emphasis on high blood pressure will be a cooperative undertaking by medical, health care and voluntary health organizations. The American Heart Association's State Affiliate and local Chapters, the Pennsylvania Department of Health, and the Pennsylvania Medical Society are among the major agencies which will be spear-heading education and detection programs scheduled for acceleration in May.

Sr. Citizen Day Planned At Hersheypark June 17

Drew Lewis, Republican candidate for Governor, and Jesse L. Lynn, resgional representative of the Social Security Administration, will speak at the Fourth Annual Senior Citizens Step-out Monday, June 17 at Hersheypark.

The park has set aside this special day for senior citizens from all over the state.

Lewis and Lynn will speak in the Hersheypark Arena at 2 p.m. Following their comments, nationally-known entertainment will be provided. Special prizes will be awarded to the oldest male and oldest female senior citizen.

Senior Citizens will receive admission to Hersheypark, which entitled them to unlimited use of all the rides and six live shows, Hershey Museum, admission to the world-famous Hershey Rose Gardens, a special program in the Hersheypark Arena, $1. worth of refreshment tickets and free parking, all included in a one-price package plan.

Information on admission and registration may be obtained from the Hersheypark Sales Department, 717-534-3916.

Consumers' Corner

Fancy Bed Sheets

If the beds in your house are wearing striped or flowered sheets, they are in fashion.

For fancy sheets have become the big sellers in stores across the country

On an industry-wide basis, fancy sheets account for about 60 percent of the total sales

Solid colors are slipping, accounting for no more than 11 to 12 percent of total sales But white sheets are still around, capturing about one-fourth of the total market.

Muslins have been gaining in sales at the expense of percales Last year, percales accounted for 55 percent of all sheet sales; muslin had the other 45 percent.

This year the market will probably split 50-50 between muslin and percale.

Popular designs feature checks and plaids, as well as colorful floral prints

Water-Waste Disposal Grants To Increase

Secretary of Agriculture Earl L. Butz has announced that as a result of a Department survey $120 million in grant funds are being added to the record $500 million in Farmers Home Administration (FmHA) loans and grants currently available for rural water and waste disposal systems in the 1974 fiscal year (FY) ending June 30, 1974. This action brings the total of rural water and waste disposal grants available for FY 1974 to $150 million, an increase of $120 million over the amount used in FY 1973.

The Secretary pointed out that FmHA had made a survey of grant needs in connection with water and waste disposal projects early in this calendar year as the result of the release of some $30 million in grant funds to communities unable to secure funds from other sources.

The survey found that there were many financially needy communities which presently lack sewer and water systems, and are not able to proceed on a "loan only" basis because most of the families to be served by such systems lack sufficient income to pay the higher "loan only" rates. As a result, the Department arrived at the decision to make available the additional $120 million and is preparing regulations which will target the funds toward the most needy rural communities.

"This further demonstrates our commitment to the development of rural communities," the Secretary said. "These additional rural development funds will permit local leaders to push ahead with water and waste disposal projects that will make their communities more attractive to industry and more pleasant places in which to live. In the present fiscal year, it means that $620 million in loans and grants will have been available to rural areas to protect the health and improve the living conditions of residents of rural America. This compares with $320 million used for this purpose in fiscal year 1973, the previous record year for such assistance."

Grid System Proposed For Mineral Discovery

If you drilled an exploratory hole every twenty miles across the length and breadth of the United States you would hit every "jackpot" of mineral resources that it took more than a century to find by trial-and-error methods.

And you'd have a jackpot far more valuable–a complete inventory of the total mineral resource potential of the country.

Dr. John C. Griffiths expounded this drastic and highly controversial approach to mineral exploration today at an energy symposium at The Pennsylvania State University.

Dr. Griffiths said that traditional "wildcat" prospecting has reached a point of diminishing returns. Furthermore, it is extremely wasteful since individual prospectors--now usually large corporations–usually look for a single resource, say, oil, and either do not see other mineral possibilities or neglect them.

A systematic, broad-spectrum approach based on a grid system, said Dr. Griffiths, is the only way to guarantee adequate resources for the future.

Some 10,000 exploratory wells would be required to "cover" the U.S. if 20-mile spacing were used. Such massive drilling, Griffiths calculates, would cost about five billion dollars.

There are 23 known "jackpots"–prime deposits of oil, lead, copper, etc.–in the country, each valued at a billion dollars or more.

"If only five new prizes are discovered by the grid method," he said, "the massive prospecting program would pay for itself."

More important, according to Dr. Griffiths, professor of petrography, mineral prospecting would be put on a systematic basis and would yield a complete inventory of our potential. Cores from the ten thousand holes would be analyzed not for one but for all known mineral possibilities, including fresh water.

Grid-systems, he pointed out, are in wide use by the military, either in search for potential targets, or for missing submarines, downed aircraft, etc. A 200-mile global grid is used by meteorologists in collecting data for weather forecasting.

A grid strategy would take much of the risk out of prospecting and would have important geopolitical ramifications.

"Only if we know what's in the ground," said Dr. Griffiths, "can we have a sound basis for national planning of the economy and an orderly development of natural resources with due consideration for their conservation."

Once the 20-mile grid drilling was completed, said Dr. Griffiths, and it would take only two or three years, it would provide information that would enable smaller targets to be found with a higher success ratio than now prevails.

"This information," he said, "would rejuvenate our approach to the study of the earth's crust to the benefit of both the theory and the practice of exploration."

Applications Available For Teenage Pageant

The 3rd annual Miss Pennsylvania Teen Ager Pageant will be held on July 26 and 27 at the Penn Harris Motor Inn in Harrisburg. On hand to crown the new winner will be Darlene Klaas of Pittsburgh, the reigning Miss Pennsylvania Teen Ager.

All Pennsylvania girls between the ages of 13 to 17 are eligible to enter. Judging is based on scholastic achievements, civic contributions, poise, personality and appearance. There is no talent or swim suit competition.

The state winner will receive, in addition to a scholarship, a six day all expense paid trip to Atlanta, Georgia to compete in the National Finals. All 50 states and the District of Columbia will be represented at the Finals, where the winner will be crowned MISS NATIONAL TEEN AGER. Cash scholarships totaling $10,000 will be awarded at the Finals.

The theme of the pageant is "What's Right About America." Each contestant is required to write a 100 word or less essay on the pageant theme and awards are given to the winners. Essays are judged by a separate panel of judges.

Application blanks may be obtained by sending a stamped, self-addressed envelope to the National Teen Ager Pageant, P.O. Box 406, Rockton, Illinois 61072.

Consultant, National Dairy Council

NUTRIENT EQUIVALENTS

It helps, when planning good nutrition, to know which foods belong in each of the four food groups They are grouped together, after all, because nutritionists know that the foods in each group offer a rather similar array of nutrients, thus they are largely interchangeable

But not all foods in a group are nutritionally equal — especially if you compare them at the same weights or quantity For this reason, you need to know what size serving of one food can be substituted for another

An Example

To give you an example, let's discuss the calcium in milk Milk is known especially for its calcium, its protein, vitamin A and riboflavin as well as a host of other essential nutrients

But can you substitute equal amounts of dairy foods, one for another, and come out with the same amount of calcium? Here are answers in terms of portions of dairy foods and some other foods that will offer the same amount of calcium Nutritionists call these calcium equivalents

Amount of Milk		Calcium Equivalents
1 cup	=	1 cup buttermilk
	=	1 cup skim milk
	=	1 cup yogurt
¾ cup	=	1 slice (1 ounce) cheddar type cheese
⅔ cup	=	3 ounces canned salmon including bones
½ cup	=	½ cup custard
	=	½ cup milk pudding
	=	½ cup greens other than spinach
⅓ cup	=	½ cup cottage cheese
¼ cup	=	½ cup ice cream
	=	1 cup cooked, dried beans

Meat, poultry and fish are known especially for the protein, iron and B vitamins they offer The following table lists foods that contain the same amount of protein as 3 ounces of lean cooked meat, not including fat or bone

Protein Equivalents of 3 oz. lean meat, cooked

6 slices (6 ounces) bologna
4½ links (4½ ounces) pork sausage
3 eggs
3 slices (3 ounces) cheddar-type cheese
3 frankfurters (packed 8 per pound)
1½ cup cooked dried beans, dried peas or lentils
1⅓ cup chili con carne with beans
¾ cup cottage cheese
½ cup peanuts
6 T peanut butter
¾ cheese pizza (14 inch)

Peter Witmer Wins PSU Dairy Award

Peter C. Witmer son of Mr & Mrs. Raymond Witmer, Willow Street, received the William R. Davey Award at a banquet held following the 49th Penn State Dairy Exposition May 4 at University Park. This award recognizes the outstanding senior member of the Penn State Dairy Science Club.

Witmer's activities included Dairy Science Club vice-president, assistant editor and business manager of the Dairyman, and overall chairmanof the 1974 Dairy Exposition. Peter was given the 1973 National Outstanding Guernsey Youth Award, and was president of the Pennsylvania Junior Guernsey Breeders Association for two terms, and served two terms as a director.

Difficult times never make the smart people frown. Because they know what to do.

They engage in some earnest fact-finding — reading and talking to experts. They think long and hard. Then they put their money where it'll be both profitable and secure.

Right now, many smart people are investing in certificates of deposit. The kind offered (with the absolute highest bank interest permitted by law) at Farmers National Bank of Quarryville.

Our six month certificate* pays 5½ percent, when you deposit a minimum $500. Our one- or two-year certificate pays 6 percent, with the same $500 minimum. We have a three-year CD, offering an attractive 6½ percent, with $500 minimum.

And, finally, a big 7¼ percent can be earned for leaving with us at least $1,000 for four years.

In these uncertain times, investing in Farmers National certificates is the smart thing to do. For smart people . . like you.

Farmers National Bank of Quarryville
Banking the way you'd do it.

"Energy Options" Discussed at PSU

A French engineer tapped the energy potential of the Caribbean off Cuba in 1929, but eleven days later the ocean unleashed its better-known muscle – a tropical gale – that demolished his installation.

A forest of windmills has been proposed to harness the winds in America's "tornado alley" – the great plains – but calculations reveal that one windmill every square mile would be required to do the job. And each one would have to be as tall as the Eiffel Tower.

These are two of the more flamboyant energy options cited by Dr. Forrest J. Remick, assistant vice president for research at The Pennsylvania State University during a special energy symposium held at the University.

"Many options exist," said Dr. Remick, "and some are more viable than others depending on geographical, geophysical, economic and other factors.

"Geothermal power, of course, is more appropriate for sections near volcanic belts, our own California coast, for instance. There are some 24 sites in the world that have reasonable potential for development of tidal power."

But as an energy panacea on a world-wide basis these and most other options prove far less attractive upon close scrutiny, Dr. Remick said, than the old stand-bys: fossil-fueled power plants and, since 1957, nuclear-fueled installations.

"In most cases," he pointed out, "the greater potential options can only be exercised in regions remote from the areas where power demand is the greatest. Prime examples include the remaining undeveloped hydro-power sites and potential tidal power sites. Thus, the transmission and storage of electricity looms as a prime subject for research and development before such options can become realized."

The same applies to solar energy, which Dr. Remick considers to be "most certainly an energy source of the future." Here, too, however, collection, storage and transmission problems must be solved before we can get solar energy on-line.

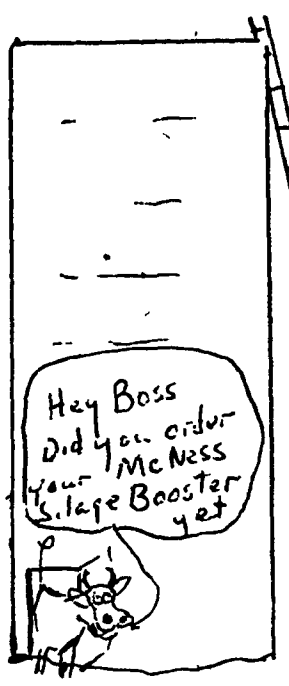
"Direct conversion from solar energy to electricity is at present hundreds of times more costly than the use of fossil or nuclear fuels; materials research breakthroughs are going to be necessary if those costs are to be reduced."

Dr. Remick expressed some enthusiasm for the long-term possibilities of the indirect use of solar energy for bioconversion to fuel. This would include the use of all organic solid wastes and the production of biomass for conversion of energy.

In biomass production and use, plants – perhaps the form of algae, grasses, trees, etc. – that are highly efficient in the conversion of solar radiation to organic matter can be utilized as a means of storing solar energy.

Following the example of some southern pulpwood companies, we might establish huge biomass-energy plantations in suitable parts of the world where plants can be continually harvested for burning. Higher costs of energy in the future may enable these forms of energy to become competitive in parts of the world.

"A 30-mile by 30-mile area would be sufficient to supply about 300 megawatts on a continuous basis and the ash of such incineration could be completely recycled onto the land as fertilizer."



If cattle can get there, they will when it's treated with McNess Silage Booster, not corrosive — Easy to apply. Prevent waste and spoilage. Only $190.00 for a 20 x 60 silo.

PRESERVE UP TO $10.00 WORTH OF PROTEIN WITH EACH $1.00 INVESTED

Farmland Assessment Meeting Held

Nearly 50 Lebanon County farmers attended a meeting on farmland assessment May 9 in the Municipal Building, Lebanon. A panel composed of State Representative Kent Shelhamer (Columbia County); Freeman Rice, Chief Assessor for Lebanon County; and Clair Gerberich, R.D.1.

Mr. Shelhamer, Minority Chairman of the House Agriculture Committee, explained the provisions of HB 1065 recently passed by the House of Representatives and now awaiting passage by the Senate. He clarified some provisions contained in the bill, which is designed to implement the so called "Clean And Green" amendment to the Constitution which was approved last year by voter referendum.

Shelhamer said, "The ecology people are very upset, because they view the legislation as a land use bill, a way that they can keep things from changing - ever. I oppose that concept - the bill as passed by the House simply provides the mechanism by which farmland can be assessed at its value for agricultural use. The basic intent is to encourage farmers to retain their land in farming. He may later sell the land for other use, but the buyer must pay the tax that would be owing under that use for a period up to ten years. The bill has the support of the PFA and the Association of Soil Conservation Districts."

County Assessor Freeman Rice, commenting on the provision contained in the legislation which authorizes the various county boards of commissioners to set the standards in each county said, "The Legislature should set guidelines on which County Commissioners could base procedures for establishing assessments for farmland." He said that in Lebanon County urban properties are now assessed at an average of 30 to 33 percent of market value while farms are assessed at about 16 percent. "Farm tax relief should be in the form of a deferment much like the present tax assistance for the elderly. When it is sold the capital gain will pay the tax."

Mr. Rice pointed out that the farmer's financial dilemma today is more a matter of economics in the market place than one of taxation on real estate. "I view our economic position today as simply moving our costs and living standard over one decimal point. Everything a farmer buys is up ten times above the levels of 20 years ago, but what he sells is only up about three or four times. Economically, the farmer is years behind other industry while technically, he is years ahead." He emphasized that if farmer received what they should for their products, real estate assessment and taxation would be a minor problem. As it is, farmers are taxed on land - an asset which is necessary for producing food and fiber. In other businesses land is only a place to park a building.

Clair Gergerich, expressing what he termed his personal views of the pending legislation, stated that he would hestitate to enter into an agreement to comply with ten year rollback provision which could require payment of taxes at a higher rate if land was sold for higher development purposes. He said that he feels that the restrictive provisions of HB 1065 would discourage farmers from taking advantage of the lower assessments for fear of depreciating the future value of their land. "What's worng with making a profit when you sell your farm? Very often that's the only time a farmer has a chance to actually get back some interest on his sweat and labor." Mr. Gerberich said that he favored the complete abolishment of real estate taxes and advocated some form of income tax in its place.

Numerous questions and comments from the audience were ably fielded by the speakers. Isaac Fox, speaking in defense of the position of the Pa. State Grange regarding HB 1065, said that the action of the federal government in exporting farm products had the effect of boosting farm prices and saved the country from a disastrous crash in farmland values.

Other viewpoints and comments were expressed from the floor by Mr. Daniel Light, William Myers, Ed Arnold and John Gerdes.

Mr. Myers expressed some concern about the federal government policy of allowing the import of dairy products. He said that he feels that these imports are depressing prices which the famer receives for dairy products.

Another viewpoint expressed was a comment by John Gerdes, 3074 West Oak Street, Lebanon, who feels that real estate taxes in general are very discriminating against the farmer. "The people who are burdened most by real estate taxes are those who, in the course of operating their business, happen to need land - lots of land and these are the farmers. Many of the highest income people in the United States do not own real estate and, therefore, pay no real estate taxes."

The meeting was arranged by the Lebanon County Agricultural Extension Service as an informational forum. The discussion was moderated by Newton Bair, Assistant County Agricultural Agent.

Products Show Names Committee

A special subcommittee has been added by the Manufacturers Association-Chamber of Commerce, joint sponsors of the October 8 - 12 Industrial Products Show will plan and develop advertising, promotion and publicity for the exposition.

Members of the special subcommittee are: David E. Wagenseller, Jr., president of Foltz-Wessinger, Inc.; Robert A. Ibold, vice president, Godfrey and Ibold, Inc.; John F. Harnish, Jr., partner, Harnish, Maclay and Shoemaker Art Associates; and Jean F. Molloy, owner, Advertising Arts.

The committee's time and ideas are being donated as a community service to aid in creating the largest industrial exposition in Lancaster County history.

How To Grow Heifers Fast!

Wayne Calf Krunch builds smooth, growthy heifers . . . fast! Young calves love its sweet, grainy texture and molasses-covered vitamin pellets, laced with milk products. It's so tempting they eat earlier, grow faster, mature and freshen sooner, adding *months* to their productive lives. When heifers freshen at two years or earlier, you *know* it works. In tests between Wayne Calf Krunch and a typical herd milking ration for starting heifer calves, the Wayne-fed calves *gained 15% more weight on 0% less starter feed!* Try it, and see.

Feed for the difference innovations make. Feed Wayne.

USDA Announces Standardized Milk Marketing Action

Actions designed to eliminate competitive inequities in the minimum prices paid to farmers selling milk to dealers were announced by the U.S. Department of Agriculture.

Effective Aug. 1 the prices paid to farmers, the number of classes of milk, and the products constituting a class will be standardized in 39 milk marketing areas in 20 states.

The marketing areas are in the central, southern and southwestern parts of the country.

The amendments are expected to result in slight, if any, changes in dairy product prices at the consumer level.

Amendments to the existing federal milk marketing orders will require identical minimal prices to prevail throughout the 39 marketing areas, three milk use classes in each of the areas instead of the current two in some and three in others, and identical dairy products to be manufactured from the same class of milk in each area.

The amendments are made necessary by the technological advances in the marketing and transportation of milk. No longer confined to their own small localities, dealers sell milk in what is increasingly wider areas. But they are regulated by their local marketing order with provisions calling for perhaps lower prices and different classifications than those in other markets.

With dealers paying producers for milk according to the use to be made of it and with the lack of uniformity in prices and classifications, competitive inequities resulted, according to officials of USDA's Agricultural Marketing Service (AMS).

They pointed out, as an example of the inequities which the amendments should eliminate, that milk to make cottage cheese brings 15 cents more per hundredweight to Kansas City marketing area farmers than to their neighbors who are under the St. Louis order.

The price paid to producers will be based on the monthly Minnesota-Wisconsin (M-W) average of prices paid by processing plants in the two states for the manufacturing grades of milk.

Class I milk covers generally all milk for fluid – bottling – use, and the M-W price in effect two months prior to the current month, plus a differential for the specific marketing area, will apply. The amendments did not change Class I.

Class II milk would be used in ice cream and other frozen desserts, bulk milk sold to commercial food processors, milk used in cottage cheese and yogurt, and all fluid cream and cream products. The Class II price would be the M-W price for the current month plus 10 cents per hundred weight. The M-W price for March was $8.15 per cwt.

Class III milk would be used for butter, milk powder, hard cheeses and evaporated milk, and the price would be the M-W price for the current month.

The amendments follow approval by cooperatives representing more than the required two-thirds of the dairy farmers affected in each of 35 milk marketing areas (market-wide pools) and more than three-fourths in the Memphis, Fort Smith, Austin-Waco and North Central Iowa markets (individual handler pools).

The amendments are based on public hearings held in Clayton, Mo., in July 1970; and in Atlanta, Ga., Dallas, Tex., and Bloomington, Minn., in October and November 1971; and also reflect exceptions from interested persons to USDA's initial and revised recommended decisions. USDA issued its initial recommendations on seven orders in June 1971, and on the other 32 orders in August 1972. It revised its recommendations for all 39 orders in August 1973, and final decisions were issued in February 1974.

Copies of the amended orders may be obtained from market administrators of each of the affected orders, AMS, USDA, Washington, or from the Dairy Division, D.C. 20250.

Need Rich Soil

Vine crops such as cucumber, squash, pumpkins and muskmelons, need a rich loam soil containing plently of organic matter, say Extension vegetable specialists at The Pennsylvania State University. Vine crops also need plently of fertilizer and insect control. If irrigation is needed, supply it during the day.

WHEAT CAN HAVE AS MUCH AS

24% PROTEIN

if cut and ensiled at the right stage of maturity. Wheat silage can be made in any kind of structure or pile on the ground if treated with IM-PRUV-ALL No. 303. Fermentation control.

NOTICE

NEW GRAIN PROCESSING

DID YOU KNOW

There is a new method of processing corn and other small grain.

We believe we are the first in the East to use the JET-SPLODER Method on a commercial basis.

Tests have proven that grain processed by this method has increased its digestability as well as the intake per animal.

Many of you are familiar with our Feeds but are not aware that we recently expanded our facilities so that we now can offer a textured complete Dairy Feed as well as a complete Dairy Feed Pellet.

Why not call and have a representative arrange an appointment to explain our Feeding Program to you.

We offer a Complete line of Dairy, Swine, Poultry and Horse Feeds; also Bulk quantity Ingredients or Bagged, for complete or custom mixing.

Grain Drying, Storage and Grain Exchange Programs.

Energy Symposium Held At Penn State

The energy crisis is not so much a matter of shortage of fuel as it is a surplus of waste heat from the fuel we already use.

Dr. Charles L. Hosler, a meteorologist and dean of the College of Earth and Mineral Sciences at The Pennsylvania State University, today made this interpretation of the crisis at a special two-day symposium on energy at the University.

Limits on our ability to dispose of waste heat, he said, may be the controlling factor over the amount of energy we dare generate.

Industrial processes and especially electric power generation, he pointed out, customarily raise the temperature of coolant water some 20 degrees F.

Dumping this hot effluent into streams would raise their temperatures to unacceptable levels.

And, huge amounts of collant water are involved.

"A 1,000 megawatt fossil fuel power plant must circulate 700-million gallons of water per day and a nuclear plant one billion gallons. This is as much water as is used daily by the city of New York and plants are being designed now with capacities of from two to ten times this size," Dean Hosler said.

The use of such volumes of water will soon prove unacceptable, said Dean Hosler; it will tax the available runoff.

A wide number of options, however, is available, according to Dean Hosler, though most, have meteorological effects. Cooling towers, ponds and similar techniques can cause fogging or icing downwind and the generation of clouds, showers, or even thunderstorms is possible, depending on the local geographic conditions.

Dean Hosler has frequently served as scientific consultant to communities and government agencies anxious to estimate the meteorological impact of varios waste-heat-dissipation techniques.

He is a member of the National Advisory Committee on Oceans and Atmospheres (NACOA).

"Berserk?"

Before an attack the Vikings sometimes ate a type of poisonous mushroom that produced hallucinations and drove a man temporarily mad. These warriors thought themselves invulnerable, and they were known by the name "berserk," meaning "bear shirt."

Registered Holstein Sets New Production Record

The all-time production record has just been broken.

For the first time, a cow has produced 45,280 pounds of milk and 2,194 pounds of butterfat in 365 days on two milkings a day.

The cow is Breezewood Patsy Bar Pontiac 6174402, a Registered Holstein bred and owned by the Gelbke Brothers of Vienna, Ohio.

Her official record-breaking lactation started on May 10, 1973 at eight years, six months of age. She is classified Excellent 90-2E.

This is her fifth record over 20,000 pounds milk and her third record over 1,000 pounds of fat.

She is currently the Junior 4-year-old National Milk and Butterfat Leader and second place Ohio Butterfat Leader.

Pontiac is a daughter of Zeldenrust Royal Pontiac (EX-SMT), a champion in his own right.

History is repeating itself, as her dam and grandam, also bred and owned by the Gelbke Brothers, were both National Production Champions.

Her dam, Breezewood Champion Barbara 4291697, is one of only nine Registered Holsteins with six records of 1,000 pounds fat. She is currently second Senior 3-year-old, 305 and 365 day National Butterfat Leader and has six records over 30,000 pounds of milk.

Patsy Bar Pontiac's grandam, Princess Breezewood R A Patsy 3816059, is a former National Fat Leader and now holds second place Mature cow, 305 and 365 day, National Fat Leader.

Breezewood Patsy Bar Pontiac will be honored at a special open house scheduled for May 20, at the Gelbke Farm.

FmHa To Provide "Interest Credits"

The Farmers Home Administration (FmHA) of the U S. Department of Agriculture (USDA) has initiated a program to further encourage the use of existing housing and provide better homes for low-income rural families through low interest home improvement loans.

The agency can now provide "interest credits" to reduce the effective interest rate on loans made to rehabilitate or repair a dwelling that a borrower already owns, and either lives in or will live in once it is brought up to standard.

Loans of up to $7,000 will be made for repairs that will improve and modernize substandard dwellings, so as to provide adequate homes in rural areas. Terms for repayment of the loan may be as long as 25 years.

To be eligible for a FmHA home improvement loan with interest credit, the housing must be located in rural countryside or a rural town of not more than 10,000 people. The loans are designed especially for low-income families.

Under this program, interest credits can reduce the effective interest rate paid by the borrower to 1 percent if the adjusted family income is less than $3,000. If the adjusted family income is more than $3,000 but less than $5,000, the interest rate will be 2 percent. If the adjusted family income is between $5,000 and $7,000, interest will be 3 percent.

The policy of making interest credit and repair and rehabilitation loans is another method of utilizing the existing supply of housing to improve living conditions for low-income rural people.

Can't Drown?

Despite legends that you can't drown in the Okefenokee Swamp because an alligator will swallow you first, a gator actually will more likely turn tail and run than attack a human

WALTER WARBURTON

MILKING HERD & BRED HEIFER DISPERSAL

TUESDAY, MAY 21, 1974

1 P.M.

Wyalusing, Pa., located 7 miles North of Wyalusing just off Rt. 706 on Water St, out of Camptown. Having decided to discontinue dairying, will sell:

55 Registered Holstein Cattle 55

(Includes 3 grades), 39 cows in milk, 16 bred heifers due July, August and September.

Mr. Warburton has been breeding Registered Holsteins for over 20 years and has developed a highly productive herd of cows that have been in great demand from other farmers and breeders in the area. The cows have size and condition and the majority of the herd is bred for summer and fall freshening. 6 daughters of Kingpin sell plus several granddaughters of Kingpin; other sires represented are Gent and Galaxy. The herd is rich in bloodlines that produce, so plan to be at Warburton on May 21st. TERMS: Cash or a good check day of sale.

AGWAY

When first cutting comes OFF

Put ON Agway Alfa B plant food

The Agway Protein Boost

Once first cutting is off, keep that protein growing with a top dressing of Agway Alfa B fertilizer. There's no better way to make sure your second and third cuttings come on strong and fast.

Agway now has available an excellent low-phosphorus, high-potash alfalfa formula, reinforced with boron.

Order it spread on the field quickly, economically and accurately with Agway Certified field spreader service.

Call now and reserve your supply. Be sure to give your fields an Agway protein boost as soon as you are finished cutting. Remember, you just can't buy high quality protein as inexpensively as you can grow it right on your own farm!
